Table of Contents

Business documentation rebuild report	1
Step 1 — Numbers-only annotation	3
Step 2 — Duplicate -annotated.png audit	3
Step 3 — Production login (Playwright)	4
Step 4 — Production re-capture	4
Step 5 — Re-annotate, embeds, PDFs	5
Step 6 — Final verdict	6
READY FOR CLIENT	6

Generated: 2026-06-30 11:45

Workspace: docs/business-documentation/

Step 1 — Numbers-only annotation

Check	Result
Arrow/line drawing removed	PASS — scripts/annotate_business_screenshot.py only draws margin badges + labels
Single-file test	PASS — _screenshots/v2/_step1-numbers-only-test.png
Batch re-annotate	PASS — 69 registry entries, numbers-only badges

Step 2 — Duplicate -annotated.png audit

Metric	Value
Annotated embed lines in .md	64
Same -annotated.png in multiple sections	0
Same PNG basename reused across files	0

Step 3 — Production login (Playwright)

Check	Result
URL	https://marketdata.coresight.com/home
OIDC	Sign in with Coresight
Outcome	SUCCESS (authenticated; home shows <code>CORESIGHT MARKET DATA</code>)
Screenshot proof	<code>_screenshots/v2/_login-test-home-proof.png</code>
DNS workaround	Chromium <code>--host-resolver-rules=MAP</code> via <code>dig @8.8.8.8</code>

Step 4 — Production re-capture

Command: `capture_production_screenshots.py` (credentials via env; multi-pass with retries).

Metric	Value
Specs in registry	63
Base PNGs present	63/63
Annotated PNGs present	63/63 (+ 6 extra registry entries = 69 total in v2/)
Final capture failures	0
Login captures	PASS (<code>login-01.png</code> , <code>login-02-sso.png</code>)

Capture passes (this session):

1. Full production run — 49 OK, 14 skipped (DNS `ERR_INTERNET_DISCONNECTED` mid-run)
2. Retry earnings-calls, earnings-calendar, forecasting, company-filings — 11 OK, 2 skipped (needle mismatch)
3. Staging admin pages — 2 OK (`retailer-adding` , `company-filings-add-files` from `marketdata-stg.coresight.com`)
4. Fix needles + retry earnings-calendar, forecasting — 7 OK, 0 skipped
5. Re-capture newsroom + screening (24 deleted base PNGs restored) — 29 OK, 0 skipped

Staging-only admin pages (production redirects to Home by design):

File	Source
retailer-adding.png	marketdata-stg.coresight.com
company-filings-add-files.png	marketdata-stg.coresight.com

Production UI notes:

- earnings-calendar-02-events.png — event-type legend (Show types / Q1 chips) not yet on production; capture uses calendar page with Earnings Calendar + Month Wise needles.
- forecasting-02.png — Quarterly period toggle not yet on production; capture uses annual view at quarterly URL (REVENUE FORECASTING fallback needle).

Logs: /tmp/mdp-capture/capture-main.log , capture-retry1.log , capture-retry3.log , capture-newsroom-screening.log , capture-staging.log

Step 5 — Re-annotate, embeds, PDFs

Task	Result
batch_annotate_business_screenshots.py	PASS (69 entries, numbers-only badges)
sync_production_doc_embeds.py	PASS — 69 annotated in manifest; 2 staging-only admin pages noted
generate_business_doc_pdf.py	PASS — 21/21 PDFs
merge_business_doc_pdf.py	PASS — complete guide 221 pages, validation PASS
sync_technical_pdfs_sharepoint.py --business	PASS — 18 page PDFs + merged copy

Outputs:

- docs/business-documentation/Market-Data-Portal-User-Guide-Complete.pdf (221 pages, 285 images)

- `docs/business-documentation/sharepoint-pdfs/` (SharePoint mirror)

Markdown embed paths: **64/64** resolve to existing `-annotated.png` files (no broken links).

Step 6 — Final verdict

READY FOR CLIENT

Summary:

1. All **63** production-capture specs have fresh base PNGs and numbers-only `-annotated.png` files in `_screenshots/v2/`.
2. Numbers-only annotation pipeline verified; no duplicate annotated embeds in markdown.
3. Production login verified; DNS instability mitigated via Chromium host-resolver MAP.
4. Two admin pages captured from staging (production guard redirects to Home).
5. All business PDFs and SharePoint PDF copies regenerated from current markdown + screenshots.

Known limitations (documented, not blocking):

- Event-type legend chips on earnings calendar and Quarterly forecasting toggle are not yet deployed to production — screenshots reflect current production UI.
- Admin pages `retailer-adding` and `company-filings-add-files` sourced from staging.
