Part 16	Retailer Adding — Business User Guide	210
Part 17	System Logs — IT Administrator Note	219

Audience: Coresight team members in sales, operations, research, and client-facing roles — anyone who uses the **Market Data Portal (MDP)** day to day. These guides assume no technical or engineering background.

Purpose: Step-by-step user guides for every MDP page — what each screen does, how to filter and search, annotated screenshots, and practical examples you can follow in your own workflow.

Classification: Confidential — Internal Use Only

Production URL: <https://marketdata.coresight.com>

How to read these guides

Each guide follows the same production format:

Section	What it gives you
Executive summary	One-paragraph overview of the page
Who this is for / What you'll learn	Whether the guide matches your role
What you can do here	Bullet list of outcomes
Page layout at a glance	ASCII diagram or region table
Step-by-step walkthrough	Numbered procedures with expected results
Annotated screenshots	Image + callout table mapping ①②③ to UI labels
Try it yourself	Short exercises with Expected outcome
FAQ	Business-language troubleshooting
Related pages	Cross-links within this folder

Screenshot conventions

- UI captures live in `_screenshots/v2/` with **numbered badge + curved arrow** callouts in Coresight red (#D62E2F) — **no bounding boxes**.
- Each annotated screenshot (`*-annotated.png`) is paired with a **callout table** (`| Callout |`
`What it is | What to do |`) directly below the image.

- Coordinate definitions are in `_screenshots/v2/CALLOUTS.md`. User-provided captures: `scripts/process_user_business_screenshots.py`. Outstanding gaps: `SCREENSHOT-GAPS.md`.

Naming

- Market Data Portal (MDP)** is the product name used throughout — not internal repository names.
- Menu labels match what you see after sign-in (for example **Market Data Dashboard**, **Earnings Calendar**, **News**).

Complete user guide (PDF)

Format	File
Merged PDF (all sections)	Market-Data-Portal-User-Guide-Complete.pdf

The merged PDF includes a branded cover, clickable table of contents, section divider pages, and embedded UI screenshots.

Guide index

Getting started

Guide	PDF	What it covers
Sign in to the portal	login.pdf	Coresight single sign-on (SSO), credentials, first-time access
Home dashboard	home.pdf	Landing page, company lookup, jumping into Market Data
Navigation & portal overview	navigation-and-portal-overview.pdf	Top menu, every major page, when to use each

Research & data

Guide	PDF	What it covers
Market Data	market-data.pdf	Financial statements, key stats, estimates, segments, company profile
Screening	screening.pdf	Multi-criteria screener, watchlists, saved criteria, exports
Newsroom	newsroom.pdf	News feed, sentiment, ticker/sector filters, search
Earnings Calls	earnings-calls.pdf	Transcript browse, keyword search, PDF download
Earnings Calendar	earnings-calendar.pdf	Calendar views, filters, email alert preferences
Live Earnings Transcript	live-earnings-transcript.pdf	Live transcript view during active calls
Company Filings	company-filings.pdf	SEC and non-SEC filing browser, metric search, PDF viewer
Revenue Forecasting	forecasting.pdf	Annual/quarterly forecasts, models, scenarios, refresh

Administration

Guide	PDF	What it covers
Company Filings — File Manager	company-filings-add-files.pdf	Upload non-SEC filings (authorized workflow)
Forecasting Admin	forecasting-admin.pdf	Forecast model administration and bulk refresh
Access Management	access-management.pdf	Page-level access control for portal admins
Retailer Adding	retailer-adding.pdf	Add and maintain retail company master data
System Logs	logs.pdf	IT admin log viewer (<i>restricted — brief note only</i>)

Suggested reading paths

If you are...	Start here	Then
New to MDP	Sign in → Home → Navigation	Market Data
Equity analyst	Market Data	Company Filings , Earnings Calls , Forecasting
Sector / comps work	Screening	Earnings Calendar , Newsroom
Data operations	Retailer Adding	Company Filings File Manager
Portal admin	Access Management	Forecasting Admin as needed
IT / platform owner	System Logs	Technical docs in docs/technical-documentation/

Generating PDFs

Markdown is the source of truth. Regenerate distribution PDFs after any guide edit:

```
# All individual guides
python scripts/generate_business_doc_pdf.py

# Single guide
python scripts/generate_business_doc_pdf.py login.md

# Merged complete user guide
python scripts/merge_business_doc_pdf.py --also-regenerate-individual

# Validate merged PDF (TOC links, blank pages, screenshots)
python scripts/merge_business_doc_pdf.py --validate-only
```

Pipeline: Markdown → embed `_screenshots/v2/` images → optional user-flow diagrams → branded HTML → PDF. Each PDF has Coresight branding, a CONFIDENTIAL header/footer, and a clickable table of contents.

Validation samples are saved to `_validation-business/` after merge.

PART 2 OF 17

Sign in to the Market Data Portal

Sign in with Coresight single sign-on (SSO) and resolve common access issues.

Welcome — this chapter begins the guided walkthrough.

How this guide is structured: Professional portal guides start with a short summary, tell you who the page is for, then walk through numbered steps with expected outcomes. Screenshots use numbered callouts (①②③) mapped to plain-language tables so sales, ops, and analysts can follow without technical background.

Executive summary

The **Coresight Market Data Portal (MDP)** uses **single sign-on (SSO)** through your existing **Coresight Research** account. You do not create a separate MDP password. Open the portal, click **Sign in with Coresight**, enter your Coresight email and password on the Coresight website, and you return to MDP automatically—usually on the Home dashboard.

Portal URL: <https://marketdata.coresight.com> (or the link your Coresight contact provided)

Who should read this

- Coresight Research **Premium members** accessing MDP for the first time
- Colleagues who need **trial access** before their account is provisioned
- Sales, research, and operations staff who sign in from a new laptop or browser

What you'll learn

- How to open the MDP welcome screen and start SSO
- What happens on the Coresight login page (email, password, security check)
- What to do after a successful sign-in, and how to request help

Before you begin

Requirement	Details
Account	Active Coresight Research login, or approved MDP trial
Browser	Current Chrome, Edge, or Safari
Network	Access to <code>coresight.com</code> and <code>marketdata.coresight.com</code> (some corporate VPNs block redirects)
Cookies	Allow cookies on the Coresight login page if the form will not submit

Step 1 — Open the MDP welcome screen

1. Go to <https://marketdata.coresight.com>.
2. If you are not already signed in, you see the **Coresight Market Data Portal** welcome page.

Expected outcome: A branded page with a red **Sign in with Coresight** button and a short note about Premium member access.

UI element	What to do
Coresight Market Data Portal title	Confirms you are on the correct Coresight product.
Sign in with Coresight button	Click to start SSO—this is the only sign-in path for MDP.
Learn more overview link	Open the product overview before signing in if needed.
Contact Us (header)	Request sales or support before you sign in.

MDP welcome screen

Callout	What it is	What to do
①	Coresight Market Data Portal title	Confirms you are on the correct product URL.
②	Sign in with Coresight button	Click to start SSO.
③	Contact Us (header)	Request access before signing in.

Also on this page:

- **Learn more: Coresight Market Data Portal Overview** — product overview if you need context before signing in.

- **Not a Premium member? Please Contact Us to request trial access** — use this link or the header **Contact Us** button to request access for yourself or a colleague.

Step 2 — Click Sign in with Coresight

1. On the welcome screen, click **Sign in with Coresight**.
2. If you need trial access, use **Contact Us** before continuing.

Expected outcome: Your browser leaves MDP and opens the **Coresight Research login page** on coresight.com.

Step 3 — Enter your Coresight credentials

On the **Coresight Research login page** (coresight.com):

1. Enter your **Coresight-registered email address**.
2. Enter your **Coresight Research password**.
3. Complete the **security check**.
4. Optionally select **Remember Me** on a trusted personal device.
5. Click **Log In**.

Expected outcome: Your browser redirects back to MDP within a few seconds—usually to **Home** or the page you originally requested.

Fields on the Coresight login page:

Field	What to enter
E-mail	Your Coresight work email
Password	Your Coresight Research password (not a separate MDP password)
Security check	Numeric answer to the prompt shown
Forgot Password	Use this on coresight.com if you need a reset email

Coresight Research SSO login form

Callout	What it is	What to do
①	E-mail field	Enter your Coresight work email.
②	Password field	Enter your Coresight Research password.
③	Log In button	Submit after completing the security check.

Don't have a Coresight account? Use **Sign up for a free account** on the Coresight page, or ask your Coresight representative to provision Premium or trial access to MDP.

Step 4 — Confirm you are inside MDP

After a successful login:

1. The **top navigation bar** appears: **Market Data Dashboard, Earnings Calls, Earnings Calendar, Screening, News, and Logout.**
2. You usually arrive on **Home** (`/home`) with the **CORESIGHT MARKET DATA** heading and company picker.
3. You can open any top-menu destination without signing in again.

Expected outcome: You can select a company on Home or click **Market Data Dashboard** without seeing the welcome screen again.

Footer links on the welcome page

Before or after sign-in, the welcome page footer includes trial-access links, legal pages, and social icons.

Footer element	What to do
Contact Us link (footer text)	Request trial access if you are not yet a Premium member.
Privacy Policy (footer)	Open Coresight's privacy terms in a new tab.
Social media icons	Follow Coresight on LinkedIn, Facebook, or X.

Welcome page footer links

Callout	What it is	What to do
①	Contact Us (footer)	Request trial access.
②	Privacy Policy	Open legal terms in a new tab.
③	Social icons	Follow Coresight on social channels.

Try it yourself

Task: Sign in and open Market Data for one company.

1. Open <https://marketdata.coresight.com>.
 2. Click **Sign in with Coresight** and complete the Coresight login form.
 3. On **Home**, open **Select a Company**, type `Walmart`, and select the company from the list.
 4. Click the red **View** button.
 5. Confirm the **Market Data Dashboard** opens with Walmart's company name in the header.
-

Common tasks

Premium member — first visit today

1. Open the portal URL → **Sign in with Coresight** → enter Coresight credentials → land on **Home**.

Request trial access for a colleague

1. On the welcome page, use **Contact Us** (header or footer text).
2. Provide the colleague's name, company, and business email.

Sign out when finished (especially on shared computers)

1. Click **Logout** in the top-right corner of any MDP page.
 2. Do not rely on closing the browser tab alone on shared machines.
-

FAQ and troubleshooting

Situation	What it usually means	What to try
Stuck on the welcome page after clicking sign-in	Browser blocked the redirect	Allow pop-ups; try another browser; check VPN/firewall rules for coresight.com
Error on the Coresight login page	Wrong email or password	Re-enter credentials; use Forgot Password on coresight.com
Cookie banner blocks the form	Cookies disabled	Accept or allow cookies for coresight.com
"Authentication failed" returns you to MDP	Session or account issue	Clear site cookies for marketdata.coresight.com and retry; contact Coresight support
I was signed in yesterday but prompted again today	Session expired or Remember Me not used	Sign in again; use Remember Me only on trusted devices
Button says Sign in with Coresight (not Microsoft)	Expected	MDP uses Coresight SSO only—there is no separate MDP username

Where to go next

- [Home dashboard](#) — Pick a company and open Market Data
- [Navigation & portal overview](#) — Map of every top-menu destination
- [Business documentation index](#) — Full guide list

— End of Sign in to the Market Data Portal —

PART 3 OF 17

Home Dashboard

Home dashboard — pick a company and jump into Market Data.

The previous section is complete — the next chapter begins below.

How this guide is structured: Each section states the goal, lists numbered actions, and shows what you should see when the step succeeds. Annotated screenshots tie numbered callouts to labels on screen so you can match the guide to MDP while you work.

Executive summary

Home is the landing hub after you sign in to the **Market Data Portal (MDP)**. It does not show financial tables—it helps you **pick a company** (or, in the future, a sector) and jump straight into that company's **Market Data Dashboard**. Most day-to-day work continues from the top navigation bar without returning here.

Who should read this

- Analysts and researchers who start research from a **company name or ticker**
- Sales and client-facing teams who need the fastest path from sign-in to one company's financials
- Anyone new to MDP who lands on Home after SSO

What you'll learn

- What the two center cards do (**View by Company** vs **View by Sector**)
 - How to search the company dropdown and enable the **View** button
 - How Home connects to Market Data and the rest of the portal
-

What Home does and does not do

Home provides	Home does not provide
Company search and one-click entry to Market Data	Income statements, estimates, or screening results
Preview of future sector browsing	Active sector reports (sector View is not yet available)
Same top navigation as every MDP page	A sidebar or secondary menu

Step 1 — Arrive on Home after sign-in

1. Complete [SSO sign-in](#).
2. MDP opens **Home** with the heading **CORESIGHT MARKET DATA** and two cards side by side.

Expected outcome: You see **View by Company** on the left and **View by Sector** on the right, plus the standard top navigation.

Home — company and sector entry cards

Callout	What it is	What to do
①	Top navigation bar	Jump to Earnings, Screening, News, or Market Data without returning to Home.
②	View by Company card	Primary entry when you know the retailer or ticker.
③	View by Sector card	Future hub for sector-level views; not active for general use today.
④	Select a Company dropdown	Type to search; pick a row from the list to enable View .

Step 2 — Select a company

1. On **View by Company**, click **Select a Company**.
2. Type part of the **company name** or **ticker** (for example `Nike` , `WMT` , `Target`).
3. Click the correct row in the filtered list—typing alone does not select a company.
4. Confirm the **View** button turns **red** and becomes clickable (it stays grey until a valid company is chosen).

Expected outcome: The dropdown shows your selection; the **View** button is active.

Home — company selected and ready to open Market Data

Callout	What it is	What to do
①	Select a Company dropdown	Confirms your chosen company before opening Market Data.
②	Red View button	Click to open that company's Market Data Dashboard.
③	Select a Sector dropdown	Placeholder—sector browsing is not yet available.
④	Grey sector View button	Disabled until sector browsing launches.

Step 3 — Open Market Data for the selected company

1. With a company selected, click the red **View** button (arrow icon).
2. MDP opens the **Market Data Dashboard** for that company.
3. You land on **Company Profile** by default.

Expected outcome: The page header shows the company name and ticker; tabs such as **Income Statement**, **Key Stats**, and **Estimates** appear below the header.

Tip: The company you pick here is remembered when you move between Market Data tabs and many other MDP pages until you change the company selector in the header.

Stock Price

Home — Market Data opens after View

Callout	What it is	What to do
①	Top navigation	Confirms you are inside MDP after View .
②	Company header	Shows the selected company name and ticker.
③	Company Profile tab	Default landing tab for Market Data.

Alternative — Return to the company picker

You can return to Home any time via the portal route after sign-in. The layout matches Step 1 above.

Home — dashboard layout

Callout	What it is	What to do
①	View by Company card	Same Select a Company flow as Step 2.
②	View by Sector card	Placeholder for future sector browsing.
③	Select a Company dropdown	Type-to-search company picker inside the left card.

View by Sector (coming soon)

The **View by Sector** card shows sample sector names in the dropdown, but the **View** button remains disabled. Hovering may show **Coming Soon**.

Expected behavior today: Use **View by Company** or the top navigation. Do not rely on sector browsing for client deliverables until Coresight announces it is live.

Try it yourself

Task: Open Nike's Market Data Dashboard from Home.

1. Sign in and confirm you are on **Home**.
2. Open **Select a Company** and type or .
3. Select **NIKE, Inc.** from the list.
4. Click **View**.
5. On Market Data, click **Income Statement** and locate **Total Revenue** for recent fiscal years.

Common tasks

I know the brand name, not the ticker

Type the consumer-facing or legal name in **Select a Company** (for example ,). Pick the matching legal entity from the dropdown.

Skip Home—I usually live in Earnings Calendar

After sign-in, click **Earnings Calendar** (or any top-nav item) directly. Home is most useful when you want a **company-first** path into Market Data.

Company missing from the dropdown

The list only includes companies in the MDP coverage universe. Contact your Coresight data contact if a retailer you expect is absent—it may not yet be onboarded.

FAQ and troubleshooting

Situation	What to try
View stays grey	Select a company from the dropdown list; typing without clicking a row does not count.
Two similarly named companies	Read the full legal name in the dropdown before clicking View .
Sector View does nothing	Expected—sector browsing is not yet available.
Footer links open coresight.com	Normal—they open in a new tab and do not sign you out of MDP.

Where to go next

- [Market Data Dashboard](#) — Financial statements, estimates, segments, and Excel export
- [Navigation & portal overview](#) — Every top-menu destination explained
- [Sign in to the portal](#) — SSO walkthrough

— End of Home Dashboard —

PART 4 OF 17

Navigation & Portal Overview

Top navigation, every major page, and when to use each tool.

The previous section is complete — the next chapter begins below.

How this guide is structured: A portal map should fit on one page mentally—summary first, then each destination with when to use it, how to get there, and what you should see. Screenshots highlight the persistent top bar and representative pages so you can orient quickly on day one.

Executive summary

After sign-in, the **Market Data Portal (MDP)** uses the same **top navigation bar** on every main page. Five destinations cover company financials, earnings transcripts, reporting calendars, universe screening, and retail news. **Home** is your company-picker shortcut (not listed in the five labels). Your **selected company** often follows you through the URL and the header company selector.

Who should read this

- New MDP users mapping where to click for each workflow
- Client-facing teams who need a one-page orientation before demos
- Researchers switching between financials, earnings, screening, and news in one session

What you'll learn

- What each top-menu item does and when to use it
- How company context (`ticker`) carries across pages
- Which tools sit outside the main menu and who can access them

The top navigation bar

#	Menu item	Best for
1	Market Data Dashboard	Single-company financials, key stats, estimates, segments, forecasts
2	Earnings Calls	Earnings call transcripts, keyword search, PDF download
3	Earnings Calendar	Who reports when; email alerts for reporting dates
4	Screening	Filter the coverage universe; save criteria and watchlists
5	News	Headline search, sentiment, sector filters, watchlists
—	Logout	End your session (use on shared computers)

Home — top navigation on an authenticated page

Callout	What it is	What to do
①	Top navigation bar	Click any label to switch tools without signing in again.
②	Market Data Dashboard link	Open the single-company financial workspace.
③	Screening link	Build filters and watchlists across the coverage universe.
④	News link	Search retail headlines and sentiment.

Navigation — Market Data, Screening, and News highlighted

Callout	What it is	What to do
①	Top navigation bar	Persistent menu on every authenticated page.
②	Market Data Dashboard link	Open the single-company financial workspace.
③	Screening link	Build filters and watchlists across the coverage universe.
④	News link	Search retail headlines and sentiment.

Expected behavior: The active page may show its label in Coresight red. **Logout** stays top-right on every page.

1. Market Data Dashboard

URL pattern: `/market_data?ticker=SYMBOL`

When to use it: Any time you need numbers for **one company**—board prep, client decks, earnings previews, comp tables.

What you get:

- **Company Profile** — Overview, stock chart, leadership context
- **Income Statement / Balance Sheet / Cash Flow** — Multi-period financials (annual and quarterly where available)
- **Key Stats & Ratios** — Headline metrics and calculated ratios
- **Segments** — Revenue or profit by division or geography when disclosed
- **Estimates** — Analyst consensus where coverage exists
- **Forecasting** — Coresight model revenue forecasts (coverage varies)
- **Additional Data** — Credit ratings, store counts, square footage when available

How to get there:

1. [Home](#) → pick a company → **View**, or
2. Click **Market Data Dashboard** in the header (uses your current ticker if one is already selected).

Deep dive: [Market Data Dashboard guide](#)

2. Earnings Calls

URL pattern: `/earnings_calls?ticker=SYMBOL`

When to use it: Read or search **earnings call transcripts**—verify quotes, scan for guidance language, download PDFs for notes.

Typical workflow:

1. Confirm the correct company in the header selector.
2. Choose fiscal year and quarter from the call list.
3. Use in-page **keyword search** for terms like “margin”, “inventory”, or “guidance”.
4. Download PDF when you need an offline copy (follow your firm’s confidentiality rules).

Deep dive: [Earnings Calls guide](#)

3. Earnings Calendar

URL pattern: `/earnings_calendar`

When to use it: Plan around **report dates**—client touchpoints, internal preview meetings, alert emails.

Typical workflow:

1. Scan the calendar month for upcoming reports in your coverage list.
2. Use on-page filters and legend controls for event types when shown.
3. Configure **email alerts** for reminders ahead of key dates.

Deep dive: [Earnings Calendar guide](#)

4. Screening

URL pattern: `/screening`

When to use it: Build **lists of companies** that pass financial, geographic, industry, or corporate-event rules—peer groups, thematic monitors, idea generation.

Typical workflow:

1. Choose **Screen For** mode (Companies, Key Developments, or People).
2. Optionally limit to a **watchlist**.
3. Stack criteria (industry, geography, financial thresholds).
4. Click **Show Results**, then export to Excel or save criteria for reuse.

How to get there: Click **Screening** in the top bar (see callout ② in the navigation screenshot above).

Deep dive: [Screening guide](#)

5. News

URL pattern: `/newsroom`

When to use it: Morning scans, headline search around earnings, linking news flow to tickers in your coverage list.

Typical workflow:

1. Enter keywords (for example “store openings”, “CEO”, “promotion”).
2. Set **From / To** dates for an event window.
3. Filter by **sector**, **category**, or a **watchlist** from Screening.

Caribou Biosciences to Participate in the H.C. Wainwright 4th Annual Cell Therapy Virtual Conference

Caribou Biosciences announced that its president and CEO, Rachel Haurwitz, PhD, will participate in a fireside chat at the H.C. Wainwright 4th Annual Cell Therapy Virtual Conference on June 30, 2026, at 10:00 am ET. The company is a clinical-stage CRISPR genome-editing biopharmaceutical company focused on developing transformative therapies for devastating diseases using its chDNA technology. Caribou is developing off-the-shelf CAR-T cell therapies, vispa-cel and CB-011, for hematologic malignancies.

Clearmind Medicine Advances Its Innovation with Newly Granted U.S. Patent, Enhancing Global Patent Strength

Clearmind Medicine Inc. announced the grant of a new U.S. Patent, No. 12,357,590, titled "BINGE BEHAVIOR REGULATORS," by the USPTO. This patent expands on a previous one and strengthens the company's intellectual property related to the MEAI molecule for regulating various compulsive binge behaviors. Clearmind Medicine, a clinical-stage biotech company, now has nineteen patent families, including 32 granted patents, bolstering its global intellectual property portfolio in neuroplastogen-derived therapeutics.

Clearmind Medicine Advances Its Innovation with Newly Granted U.S. Patent, Enhancing Global Patent Strength

Clearmind Medicine Inc. announced the grant of a new U.S. Patent, No. 12,357,590, titled "BINGE BEHAVIOR REGULATORS," by the USPTO. This patent expands on a previous one and strengthens the company's intellectual property related to the MEAI molecule for regulating various compulsive binge behaviors. Clearmind Medicine, a clinical-stage biotech company, now has nineteen patent families, including 32 granted patents, bolstering its global intellectual property portfolio in neuroplastogen-derived therapeutics.

ECC SEC Filings - Eagle Point Credit Co LLC 10-K, 10-Q, 8-K Forms

This page provides a comprehensive resource for Eagle Point Credit Co (ECC) SEC filings, including 10-K, 10-Q, and 8-K forms, alongside insider trading information. It details how Stock Titan aggregates these regulatory disclosures, offering AI-powered tools for interpretation, such as summaries, impact scoring, and sentiment analysis for each filing. The article highlights recent filings, covering insider purchases, NAV estimates, and corporate structural changes.

Tagged Companies: ECCX

News — filters with company context

Callout	What it is	What to do
①	Search box	Refine keyword search across headlines and summaries.
②	From / To dates	Set the date window before searching or scrolling.
③	Sector dropdown	Limit articles to one industry sector.
④	Category dropdown	Filter by news topic (earnings, M&A, macro, etc.).
⑤	Watchlist dropdown	Show only articles tagging companies on a saved list.

Deep dive: [Newsroom guide](#)

Home — the company-picker shortcut

URL: `/home`

When to use it: Fastest path from “signed in” to “show me this company’s Market Data.”

Not shown as a sixth top-nav label, but reachable after login and linked from onboarding materials. See [Home dashboard guide](#).

Company context — how your ticker follows you

Many URLs include `?ticker=WMT`. Data pages also show a **company selector** in the header.

Practice	Why it helps
Pick the company once on Home before hopping between Market Data, Earnings, and News	Avoids re-searching the same ticker
Change the header dropdown	Updates the URL and refreshes page content for the new company
Bookmark URLs with a ticker	Quick return for recurring client work (for example <code>/market_data?ticker=TGT</code>)

Pages outside the top menu

Access depends on role, direct links, or admin provisioning.

Page	Who uses it	Purpose
Forecasting	Research / forecast users	Dedicated revenue forecast explorer
Company Filings	Research, compliance	SEC and non-SEC filing browser with PDFs
Live Earnings Transcript	Event coverage	Live transcript during select calls
Retailer Adding	Data operations (restricted)	Manage companies in coverage
Forecasting Admin	Forecast administrators	Refresh forecast pipelines
Access Management	Admins	Page-level access control
Logs	Support admins	Server log viewer

If you do not see these links, your account has not been granted that page—contact a Coresight administrator.

Footer — external Coresight links

The footer on major pages links to **coresight.com** (subscriptions, events, contact, Research Portal, podcast, AI Council). These open in a **new tab** and do **not** sign you out of MDP.

Try it yourself

Task: Find Walmart’s next reporting context and read the latest call.

1. Click **Earnings Calendar** → locate Walmart on the calendar or filter to the company.
2. Click **Earnings Calls** → confirm Walmart is selected → open the most recent quarter.
3. Click **Market Data Dashboard** → open **Estimates** for consensus context.

FAQ and troubleshooting

Situation	What to try
Menu item missing	Your account may lack page access—contact Coresight admin.
Page loads slowly the first time	Data-heavy pages may take a few seconds after login; wait before assuming data is missing.
Empty news or calendar	Widen date filters or confirm the ticker is in MDP coverage.
Narrow browser window	Use desktop width for the full five-item menu.
Forecasting tab missing for a company	Coverage limitation—not a sign-in problem.
Prefer Logout over closing the tab	Especially on shared machines.

Where to go next

PART 5 OF 17

Market Data Dashboard — Business User Guide

Financial statements, key stats, estimates, segments, and company profile.

The previous section is complete — the next chapter begins below.

How this guide is structured: Detailed product guides pair a quick summary with tab-by-tab procedures, filter explanations, and export steps. Numbered callouts in screenshots map directly to UI labels so you can follow along in the live portal.

Executive summary

The **Market Data Dashboard** is MDP's **single-company research workspace**. Choose one retailer or brand at a time, then move across tabs—profile, financial statements, key stats, ratios, estimates, forecasts, segments, and supplemental data—without losing your place. Most tabs share period, currency, and unit filters; **Estimates** and **Forecasting** keep their own date ranges. Nearly every tab offers **one-click Excel export** of what you see on screen.

Who should read this

- Analysts and researchers building comps, earnings notes, or client decks
- Sales and strategy teams who need trusted numbers without opening a separate terminal
- Operations staff pulling store counts, ratings, or segment splits for benchmarking

What you'll learn

- Three ways to open Market Data and how to change company
- What each of the **ten tabs** shows, which filters apply, and how to export
- Shared filter behavior, practical workflows, and common “why does this look wrong?” answers

How to open Market Data

Route	Steps	Expected outcome
From Home	Home → Select a Company → View	Lands on Company Profile for that company
From top navigation	Click Market Data Dashboard on any page	Opens Market Data for your current ticker (if set)
From another MDP page	Switch to Market Data while a company is already selected	Same company carries forward

Home — entry point to Market Data

Callout	What it is	What to do
①	Select a Company dropdown	Confirm the correct company is selected.
②	Red View button	Click to open Market Data for that company.
③	Select a Sector dropdown	Placeholder—sector browsing is not yet available.
④	Grey sector View button	Disabled until sector browsing launches.

Page layout — four regions

Once a company loads, expect these areas on every visit:

Region	What it contains
Top navigation	Market Data, Earnings Calls, Earnings Calendar, Screening, News, Logout
Company header	Company name, exchange ticker, searchable company dropdown, Company Documents
Tab row	Ten views (see table below); active tab highlighted in red
Main content	Tables, charts, or profile text; financial tabs add a filter row above data

The ten tabs — quick reference

Tab	Best for	Shared financial filters?	Excel export?
Company Profile	Overview, stock chart, leadership	No	Yes
Key Stats	Headline metrics across years (actuals, estimates, forecasts)	Yes	Yes
Income Statement	Revenue, margins, net income	Yes	Yes
Balance Sheet	Assets, liabilities, equity	Yes	Yes
Cash Flow	Operating, investing, financing cash	Yes	Yes
Ratios	Margins, returns, leverage	Dates & sort only	Yes
Estimates	Analyst consensus	Separate date range	Yes
Forecasting	Coresight model forecasts (annual)	Separate date range	Yes
Segment	Business and geographic breakdowns	Yes	Yes
Additional Data	Ratings, store counts, square footage	Dates & sort only	Yes

Some tabs may show a **Testing in Progress** label—data is still available; Coresight is refining those views.

Choosing and changing company

Company dropdown

The company name at the top is a **searchable list**, not a static label.

1. Click the company name to open the dropdown.
2. Type to filter (for example or).

3. Select a row such as **Apple Inc (AAPL)**.
4. The page reloads for the new company; filters reset to sensible defaults (typically about five annual years in reporting currency).

Expected outcome: Header, tabs, and tables all reflect the newly selected company.

Company Documents

Company Documents (right of the company name) opens **Company Filings** for the current ticker in a **new browser tab**—use this for 10-K, 10-Q, and source PDFs rather than summarized MDP tables.

Shared filters (financial tabs)

Most tabs except **Company Profile** show a **filter row** above the table.

Control	Plain-language meaning
Period Type	Annual = full fiscal years. Quarterly = individual quarters (Q1–Q4). If quarterly is unavailable for a metric, the page stays on Annual and may show a short notice.
Start Date / End Date	First and last reporting period to include (shown as month-year labels).
Sort	Earliest = oldest period on the left. Latest = newest period on the left.
Conversion	Today's Spot Rate uses one exchange rate as of today. Historical uses the rate that applied in each period (better for long-run cross-currency comparisons).
From Currency	Company reporting currency (fixed).
To Currency	Display currency—for example convert a European retailer from euros to US dollars.
Units	Millions (mm) , Billions (bn) , or Thousands (k) —changes labels only, not underlying data.

Tabs with simplified filters

Tab	Filter notes
Ratios	Start/end dates and sort only—ratios are percentages or multiples.
Additional Data	Annual periods; dates and sort only.
Forecasting	Annual only; Period Type hidden.
Estimates	Date choices apply only on this tab —they do not change Income Statement dates when you switch back.

Worked example — five years of revenue in billions, newest first

1. Select **Walmart Inc (WMT)**.
2. Open **Income Statement**.
3. Set **Period Type** to **Annual**.
4. Set **Start / End** to cover five fiscal years.
5. Set **Sort** to **Latest**.
6. Set **Units** to **Billions (bn)**.
7. Locate **Total Revenue** in the table.

Expected outcome: Five annual columns with revenue expressed in billions, most recent period leftmost (if **Latest** sort).

Tab-by-tab walkthrough

Company Profile

What you see

- **Profile table** — Website, employees, market cap, exchange, country, currency, Coresight sector.
- **Business description** — Narrative summary of operations.
- **Stock price chart** — Roughly five years of daily closes, with latest price, day change, 52-week range, market cap, shares, dividend yield.

- **Executive compensation** — Recent pay for named executives when available.
- **For Reference** — Extra reference fields when provided.

Filters: None.

Excel: Downloads profile fields, price history, and related summary sections.

Try it: Open **Target Corp (TGT)** → **Company Profile** → confirm sector and recent price action before a store-count analysis.

ROA %	5.53%	5.50%	4.78%	6.26%	7.57%

Ratios assumptions: Valuation metrics use latest available market cap for all displayed periods (Price/Book, EV/Revenue, EV/EBITDA vary only by the financial-statement denominator). | P/E is computed as Market Cap / Net Income; shown as '-' when net income is zero or unavailable. | Dividend Yield uses the latest company overview value and is constant across all displayed periods. | Enterprise Value is simplified as Market Cap + Total Debt - Cash. | Average-balance ratios require prior comparable period; otherwise shown as missing. | Capex uses absolute magnitude for EBITDA-Capex denominator when capex is stored as outflow.

Market Data — Ratios

Estimates

What you see

Forward-looking **analyst consensus**—revenue and EPS by period. EPS typically stays in reporting currency; revenue may respect **To Currency**.

Important: Adjusting estimate years here does **not** change historical statement windows on other tabs.

Try it: Review next-fiscal-year revenue estimate columns for **Amazon (AMZN)** before an earnings preview.

Market Data — Forecasting tab

Segment

What you see

Business segment (product lines, divisions) and **geographic segment** (regions, countries) when filings provide them. Metrics may include Revenues, Operating Profit, Assets, D&A, and Capex depending on disclosure.

Quarterly appears only when segment data exists at quarterly frequency for that company.

Try it: See what share of **Total Revenue** comes from **North America** vs international for a global retailer.

Market Data — Segment

Additional Data

What you see

Supplemental metrics when available:

- **Credit ratings** (S&P, Moody's, Fitch)
- **Store counts** and **stores by country**
- **Square footage**

Filters: Annual periods; dates and sort only (no currency conversion).

Try it: Pull **store count** history when benchmarking physical footprint across big-box peers.

Downloading to Excel

Nearly every tab exposes an **Excel** button (red outline, table icon).

Step	What happens
1	Set company, tab, and filters first—the export matches what you see .
2	Click Excel .
3	Your browser downloads a file named like <code>AAPL_Income_Statement.xlsx</code> or <code>WMT_Key_Stats.xlsx</code> .
4	Open in Excel or Google Sheets—no separate export dialog.

Company Profile Excel may include multiple sections: profile fields, price history, shares, compensation.

Expected outcome: Spreadsheet columns align with on-screen periods, currency, and units (where applicable).

How tabs share your place

Behavior	Detail
Same company	Persists across tabs until you change the dropdown
Most financial tabs	Share period type, date range, sort, currency, and units
Estimates & Forecasting	Keep their own date ranges
Change company	Resets filters to defaults (typically ~5 annual years, reporting currency)

Practical workflows

Workflow 1 — Earnings prep for one name

1. **Company Profile** — Confirm ticker, sector, recent price.
2. **Key Stats** — Note latest **A** and upcoming **E** columns.
3. **Income Statement** — Revenue and margin trend.
4. **Estimates** — Forward consensus.
5. **Excel** — Export Key Stats for your model template.

Workflow 2 — Peer footnote for a sector note

1. Open **Segment** for each peer.
2. Align **Annual** dates across names.
3. Export each segment table to Excel.
4. Combine in your research document.

Workflow 3 — Credit and footprint check

1. **Additional Data** — Ratings and store counts.
2. **Balance Sheet** — Debt and liquidity lines.
3. **Ratios** — Leverage and coverage metrics.

Try it yourself

Task: Build a five-year revenue view and export it.

1. From [Home](#), select **Costco Wholesale (COST)** and click **View**.
2. Open **Income Statement**.
3. Set **Annual**, five fiscal years, **Latest** sort, **Billions** units.
4. Confirm **Total Revenue** trend visually.
5. Click **Excel** and open the downloaded file.

FAQ and troubleshooting

What you see	What it usually means	What to try
Brief loading message	Data still retrieving	Wait up to a minute on first open; refresh once
Unable to load company data	Temporary data or network issue	Retry; try another ticker; contact Coresight support if it persists
Quarterly option unavailable	Company lacks quarterly data for that tab	Use Annual
Empty table	Date range excludes all periods	Widen Start / End dates
Numbers look too small or large	Units mismatch	Switch Units between Millions and Billions
Estimate dates differ from statement dates	Expected by design	Estimates/Forecasting dates are tab-specific
No Forecasting tab	Company not in forecast coverage	Use Estimates or Key Stats E columns instead
Excel file does not match screen	Filters changed after preview	Set filters, confirm table, then export again

— End of Market Data Dashboard — Business User Guide —

PART 6 OF 17

Screening — Business User Guide

Multi-criteria screener, watchlists, and saved criteria.

The previous section is complete — the next chapter begins below.

How this guide is structured: Screening guides walk criterion-by-criterion with expected counts after each step, saved-filter reuse, and export paths. Numbered callouts in navigation screenshots map directly to UI labels.

Executive summary

Screening lets you **find companies** (or people and corporate events) that match business rules—for example *US apparel retailers with revenue above \$1 billion*—without writing formulas. Stack criteria one at a time, see how many names remain, **save** filter sets, attach **watchlists**, and **export** results to Excel. Companies that lack a data point usually stay in the list with **N/A** rather than disappearing silently.

Who should read this

- Researchers building peer groups, thematic lists, or event monitors
- Strategy and sales teams who need reproducible company universes for outreach or analysis
- Anyone who saved a screen last month and wants to rerun it on fresh data

What you'll learn

- How to open Screening and choose **Screen For** mode
- How **watchlists**, **criteria types**, and **saved screenings** fit together
- End-to-end steps to run a screen, export Excel, and save results as a new watchlist

How to open Screening

1. Sign in to MDP.
2. Click **Screening** in the top navigation bar.

Expected outcome: Page title **CORESIGHT MARKET DATA** with a subtitle such as **Company Screening**, **Key Developments Screening**, or **People Screening** depending on mode.

Navigation — Screening in the top menu

Callout	What it is	What to do
①	Top navigation bar	Same menu on every authenticated MDP page.
②	Screening link (active)	Confirms you are on the Screening builder.
③	Screen For row	Confirm Companies (or switch mode).

CONFIDENTIAL

Coresight Research — Internal Use Only

Page 68 of 221

Screen For — three active modes

The **Screen For** row is a set of radio buttons across the top of the builder.

Mode	Subtitle	Status	What you get
Companies	Company Screening	Active	Financial and descriptive filters; main results grid
Key Devs	Key Developments Screening	Active	Corporate events (M&A, leadership, etc.) per matched company
People	People Screening	Active	Executive compensation for matched companies
Equities	Equity Screening	Coming soon	Placeholder
Fixed Income	Fixed Income Screening	Coming soon	Placeholder
Transactions	Transaction Screening	Coming soon	Placeholder
Projects/Portfolios	Project/Portfolio Screening	Coming soon	Placeholder

Important: Switching modes **clears current criteria** so results stay meaningful for the new object type. Save your work first if you need to return to it.

Watchlists — limit who you screen

The **Watchlists** bar sits above **Add Criteria**.

Control	What it does
Watchlists dropdown	— None — screens the full universe, or pick a saved list
Edit / Manage	Create, rename, add/remove companies, share access
Active line (red text)	When selected: <i>Filtering by: List name (N companies)</i>

Screening — Watchlists dropdown on the builder

Callout	What it is	What to do
①	Screen For row	Confirm Companies (or switch mode).
②	Watchlists dropdown	Pick a saved list or leave — None — .
③	Edit / Manage	Open the watchlist manager dialog.

Why watchlists matter

- Rerun the same screen on a **fixed peer set** without re-picking dozens of tickers.
- Share lists with colleagues (view, edit, or admin access depending on grant).

CONFIDENTIAL

Coresight Research — Internal Use Only

Page 70 of 221

- **Show Results** with **only** a watchlist and **no** criteria still works—you get all companies on that list.

ATZ	Aritzia	Apparel and footwear speciality retailers	Canada
ABF 	Associated British Foods plc	Apparel and footwear speciality retailers	United Kingdom

Close

Screening — new watchlist form

Callout	What it is	What to do
①	Name field	Required—identify the list (for example “US Big-Box Peers”).
②	Search Companies	Multiselect by company name or ticker.
③	Search Sectors	Bulk-add names from a sector tag.
④	Create Watchlist	Save the new list.

Area	Action
Name & description	Identify the list ("US Big-Box Peers")
Add companies	Search multiselect by company name or ticker
Add by sector	Bulk-add names from a sector tag
Company table	Review members; delete individual rows
Access grants	Invite colleagues with view, edit, or delete rights
Save / Delete	Persist changes or remove the list

Try it: Build a watchlist of ten apparel retailers, select it in the dropdown, then add **Total Revenue Greater Than \$1,000 mm** for FY Latest—results evaluate only those ten names.

Add Criteria — four building blocks

Below the watchlist bar, **Add Criteria** offers four buttons (plus **Saved Screenings** on the right).

Button	Purpose
Industry Classifications	Keep companies in selected retail / industry sectors
Geographic Locations	Keep companies incorporated in selected countries
Financial Information	Filter on statements, key stats, ratios, segments, estimates, or forecasts
Key Developments by Category	Filter on corporate events (acquisitions, store openings, leadership, etc.)
Saved Screenings	Load, inspect, edit, or delete criteria sets you saved earlier

Click a button once to open its form; click again to collapse. Only one form is open at a time.

Building criteria — step by step

Industry Classifications

1. Click **Industry Classifications**.
2. In the expander, use **Select industries** (multiselect). Type to search.
3. Click **Add Criteria** to stack the rule, or **Cancel** to close without saving.

Expected outcome: A numbered criterion card appears in the **Active criteria** stack with a count of industries selected. Expand the card to see every industry as a pill.

Example: Choose **Specialty Retail** and **Department Stores** for traditional brick-and-mortar focus.

Step 3 — Set Period Type & Year

Period Type

FY (Annual)

Year selection ⓘ

☒ Single year
☐ Year range

Year

Latest

Step 4 — Set Operator & Value

Screening — value in \$mm

Callout	What it is	What to do
①	Operator	Confirms the comparison type.
②	Value (\$mm) field	Enter the threshold in millions (1000 = \$1 billion).
③	Add Criteria	Finish the wizard step.

Step 1 — Statement type

Statement type	Examples of metrics
Income Statement	Total Revenue, Gross Profit, Operating Income, Net Income
Balance Sheet	Total Assets, Total Debt, Cash
Cash Flow	Operating Cash Flow, Capital Expenditure
Key Stats	Revenue, EBITDA, EPS
Ratios	Gross Margin, ROA, Debt/Equity
Business Segments	Segment revenue or profit by division
Geographical Segments	Revenue by region
Estimates	Forward analyst consensus fields
Forecasting	Coresight model forecast fields

Step 2 — Metric — Pick the exact line item (options change with statement type).

Step 3 — Period type and year

Period type	Meaning
FY	Single fiscal year (pick year or Latest)
CQ	Calendar quarter (Q1–Q4)
FQ	Fiscal quarter aligned to company fiscal year end
TQ	Trailing quarters as columns (Income/Balance/Cash only)

Supported statements may also offer **year range** or **quarter range** to show multiple period columns.

Step 4 — Operator and value

Operator	Use when
Greater Than	Minimum threshold
Less Than	Maximum threshold
Between	Lower and upper bound
Equals / $\geq$ / $\leq$	Exact or inclusive cuts

Values are entered in millions of dollars (\$mm) unless the metric is a percent or multiple (unit label changes accordingly).

Optional — Segment members (Business / Geographical Segments only) — Limit to specific segments (for example **North America** only).

Optional — Additional Data (Income, Balance, Cash only) — Nested filters for **Credit Ratings (S&P)** or **Store Counts**.

4. Click **Add Criteria**.

Worked example — retailers with revenue > \$1B

Step	Action
1	Screen For: Companies
2	Financial Information → Income Statement → Total Revenue
3	Period: FY , Year: Latest
4	Operator: Greater Than , Value: 1000 (= \$1,000 million = \$1 billion)
5	Add Criteria → Show Results

Optional first: **Industry Classifications** → retail sectors to exclude non-retail names that clear the revenue bar.

Screening — Key Developments category picker

Callout	What it is	What to do
①	Key Developments by Category tab	Open the event-type builder.
②	Select Categories dropdown	Choose acquisitions, store openings, leadership changes, etc.
③	Add Criteria	Stack the event filter.

1. Click **Key Developments by Category**.
2. Select **event categories** (acquisitions, store openings, executive changes, etc.).

3. Choose a **time window** (preset ranges or custom dates).
4. Click **Add Criteria**.

In **Key Devs** mode, **Show Results** produces **one row per event** with company, date, category, headline, and source link where available.

Active criteria stack

After each **Add Criteria**, a card appears above the action buttons showing:

- **Number** (order matters—criteria apply top to bottom)
- **Summary line** (human-readable)
- **Edit** and **Remove** controls
- Expandable detail for every industry, country, or threshold

Status bar messages

Message	Meaning
<i>Universe: N companies available</i>	Full MDP universe (N changes over time)
<i>Universe: N companies (watchlist: Name)</i>	Watchlist is active
<i>Working set: N companies — last filter: ...</i>	Count after criteria applied
<i>No companies match all current criteria</i>	Combination too tight—relax a rule

Show Results, Clear All, and Save Criteria

Button	Behavior
Show Results (red)	Runs or refreshes the results table. Enabled when you have at least one criterion or an active watchlist. A loading overlay may appear while the grid builds.
Clear All	Removes every criterion and clears results; does not delete saved watchlists themselves.
Save Criteria	Appears once you have criteria—name and describe the set for later reuse.

Saved Screenings dialog

- Browse cards (name, author, date).
- **Load** applies criteria to the builder.
- **View / Edit** tweaks filters or renames the set.
- **Delete** removes the saved set (with confirmation).
- Share view or edit rights with colleagues like watchlists.

Results grid (Companies mode)

When **Show Results** completes in **Companies** mode, you see a **filterable data grid**.

Typical columns

- Company name and ticker (pinned left for horizontal scroll)
- One column per criterion (metric value or **N/A**)
- Extra context columns depending on criteria type

In-grid actions

Action	How
Sort	Click column headers
Filter	Column header filter menus
Scroll	Wide tables scroll horizontally; company name stays visible
Select rows	Checkboxes when saving a new watchlist from results

Segment criteria may render an expanded segment breakdown below the main grid with its own Excel export when columns are wide.

Excel export

When results are visible, **Excel** or **Download Excel** appears above the grid.

Mode	Typical file name
Companies	Screening_Results_YYYYMMDD_HHMM.xlsx
Key Devs	KeyDev_Screening_...xlsx
People	People_Screening_...xlsx

The file matches your current results. If export fails, retry or contact Coresight support.

Workflow: Run the \$1B revenue screen → sort by revenue descending → **Excel** → paste into a sector dashboard.

Key Developments mode — differences

Topic	Companies mode	Key Devs mode
Primary output	Company rows	Event rows
Typical criteria	Financial + industry/geo	Key Developments categories + optional company filters
Show Results without criteria	Needs watchlist or criteria	Watchlist alone can list events for those tickers
Excel	Company metric table	Event list with categories and dates

Use when the question is *“What happened?”* rather than *“Who cleared a financial bar?”*

People mode — differences

People Screening focuses on **executive compensation** for companies matching industry, geography, and optional financial filters.

Topic	Behavior
Criteria palette	Industry and Geography always; Financial optional
Watchlist	Still available
Results	Executives with pay components
Year filter	Dropdown above table for filing year
Excel	People-specific workbook

Save results as a new watchlist

After a company screen:

1. Select interesting rows in the grid.
2. Use **Save as Watchlist** when the panel appears.
3. Reuse that list on the next screen or open names in [Market Data](#).

Expected outcome: A named list you can pick from the **Watchlists** dropdown on future visits.

End-to-end example — US retailers over \$1B revenue

Step	Action
1	Open Screening → confirm Companies is selected
2	<i>(Optional)</i> Geographic Locations → United States → Add Criteria
3	Industry Classifications → retail-related industries → Add Criteria
4	Financial Information → Income Statement → Total Revenue → FY Latest → Greater Than → 1000 → Add Criteria
5	Review status bar count
6	Show Results
7	Sort by revenue column descending
8	Excel to download
9	Save Criteria as “US Retail >\$1B Revenue” for one-click reload next month

Try it yourself

Task: Build and save a simple size screen.

1. Click **Screening** in the top nav.
2. Stay on **Companies**.
3. Add **Financial Information** → Income Statement → **Total Revenue** → FY **Latest** → **Greater Than** → **500** (\$500 million).
4. Click **Show Results** and note the match count.
5. **Save Criteria** as “Mid-size retailers >\$500mm”.
6. Open **Market Data Dashboard** for the first result and compare revenue to your threshold.

Tips for accurate screens

Tip	Why
Start broad, then narrow	See which criterion removed too many names
Prefer Latest FY for "current" size	Avoids stale fiscal years
Remember \$mm	1000 = \$1 billion revenue
Use watchlists for fixed peers	Faster and reproducible
N/A in a column	Missing metric for that period—not always a failed screen
Re-run Show Results after edits	Grid does not auto-refresh on every small change
Save before switching Screen For mode	Mode switch clears criteria

FAQ and troubleshooting

What you see	What to try
Show Results disabled	Add at least one criterion or select a watchlist
Zero companies	Loosen thresholds or remove the last criterion
Long loading overlay	Wait up to a minute; refresh once
Excel button missing	Run Show Results first; confirm grid is not empty
Mode switch lost my work	Expected—save criteria before switching modes
Geography form warning	Contact Coresight support if it persists after refresh

PART 7 OF 17

Newsroom — Business User Guide

News feed with sentiment, ticker filters, and sector browsing.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: News Results (menu: **News**)

URL path: `/newsroom`

Executive summary

The **Newsroom** is MDP’s curated financial news feed. It pulls headlines and summaries from major market-data sources into one scrollable stream, tags **which companies each story mentions**, and shows **sentiment** (bullish, bearish, or neutral) when metadata is available. Use it for morning scans, theme tracking, and jumping from a headline to a company’s **Market Data Dashboard**.

Who this is for

Audience	Typical use
Sector analysts	Monitor breaking news across retail and related coverage
Research associates	Search headlines for themes such as “inventory,” “promotions,” or “guidance”
Portfolio-minded users	Limit the feed to a watchlist built on the Screening page
Anyone in MDP	Open a tagged company link to view financials without leaving the portal

What you’ll learn

- How the **filter bar** controls date range, sector, category, sort order, and watchlists
- How **keyword search** works across headlines and summaries
- How to read **sentiment tooltips** on tagged companies
- Workflows for daily news sweeps and watchlist-only monitoring

What you can do here

- Browse financial news for a chosen **date range** (defaults to roughly the last seven days)
- **Search** headlines and summaries for keywords — press **Enter** to apply

- Filter by **sector**, **category**, or a saved **watchlist**
 - Sort **Latest** (newest first) or **Earliest** (oldest first within the range)
 - Click a **headline** to open the publisher's article in a new tab
 - Click a **tagged company** (red link) to open **Market Data Dashboard** for that ticker
-

Caribou Biosciences to Participate in the H.C. Wainwright 4th Annual Cell Therapy Virtual Conference

Caribou Biosciences announced that its president and CEO, Rachel Haurwitz, PhD, will participate in a fireside chat at the H.C. Wainwright 4th Annual Cell Therapy Virtual Conference on June 30, 2026, at 10:00 am ET. The company is a clinical-stage CRISPR genome-editing biopharmaceutical company focused on developing transformative therapies for devastating diseases using its chRDNA technology. Caribou is developing off-the-shelf CAR-T cell therapies, vispa-cel and CB-011, for hematologic malignancies.

Clearmind Medicine Advances Its Innovation with Newly Granted U.S. Patent, Enhancing Global Patent Strength

Clearmind Medicine Inc. announced the grant of a new U.S. Patent, No. 12,357,590, titled "BINGE BEHAVIOR REGULATORS," by the USPTO. This patent expands on a previous one and strengthens the company's intellectual property related to the MEAI molecule for regulating various compulsive binge behaviors. Clearmind Medicine, a clinical-stage biotech company, now has nineteen patent families, including 32 granted patents, bolstering its global intellectual property portfolio in neuroplastogen-derived therapeutics.

Callout	What it is	What to do
①	Search box (filter row)	Type a keyword — for example <code>inflation</code> , <code>earnings</code> , or <code>retail</code> — then press Enter .
②	From / To date pickers	Widen or narrow the window of articles MDP loads from the database.
③	Sort / Sector / Category row	Refine results by recency, industry sector, or news category.
④	Search News panel (left)	Lists keyword hits when you run a search; shows instructions before that.

The **Search News** panel on the left lists keyword hits when you run a search; before that, it shows instructions to type a keyword above.

Step-by-step walkthrough

Step 1 — Open News from the top menu

1. Sign in to MDP.
2. Click **News** in the top navigation bar.
3. Confirm the page title reads **News Results** under **CORESIGHT MARKET DATA**.

The filter row loads with a default date range (about the last week). Articles appear in the right column after MDP finishes loading.

Step 2 — Set your date range and sort order

Caribou Biosciences to Participate in the H.C. Wainwright 4th Annual Cell Therapy Virtual Conference

Caribou Biosciences announced that its president and CEO, Rachel Haurwitz, PhD, will participate in a fireside chat at the H.C. Wainwright 4th Annual Cell Therapy Virtual Conference on June 30, 2026, at 10:00 am ET. The company is a clinical-stage CRISPR genome-editing biopharmaceutical company focused on developing transformative therapies for devastating diseases using its chRNA technology. Caribou is developing off-the-shelf CAR-T cell therapies, vispa-cel and CB-011, for hematologic malignancies.

Clearmind Medicine Advances Its Innovation with Newly Granted U.S. Patent, Enhancing Global Patent Strength

Clearmind Medicine Inc. announced the grant of a new U.S. Patent, No. 12,357,590, titled "BINGE BEHAVIOR REGULATORS," by the USPTO. This patent expands on a previous one and strengthens the company's intellectual property related to the MEAI molecule for regulating various compulsive binge behaviors. Clearmind Medicine, a clinical-stage biotech company, now has nineteen patent families, including 32 granted patents, bolstering its global intellectual property portfolio in neuroplastogen-derived therapeutics.

News Results — date picker

Callout	What it is	What to do
①	From date	Open the calendar to set the start of your window.
②	Calendar picker	Click a day to set From (highlighted in red).
③	To date	Set the end of the range.
④	Article feed	Widen From backward if the feed looks empty.

Additional controls in the same row:

Control	Options	When to use
From / To	Calendar pickers	Expand From backward to load older stories before searching
Sort	Latest · Earliest	Latest for morning scans; Earliest to reconstruct a timeline
Sector	All · named sectors	Focus on Technology, Consumer Cyclical, etc.
Category	All Categories · topics	Group by earnings, M&A, macro themes, and more
Watchlist	— No watchlist — · your lists	Show only articles that tag at least one company on the list

How to use it:

1. Adjust **From** and **To** if the feed looks empty — the default week may miss older but relevant stories.
2. Leave **Sort** → **Latest** for a standard news sweep.
3. Optionally pick **Sector** or **Watchlist** before scrolling.

Step 3 — Run a keyword search

1. Click the **Search** box in the filter row.
2. Type at least two characters — for example `promotional` or `same-store`.
3. Press **Enter** (there is no separate Search button).
4. Read matching headlines in the left **Search News** panel.
5. Click a left-panel result to scroll the right column to the full article card.
6. Matching words are **highlighted in red** in both panels.

Example — retail analyst tracking promotions

Set **From** to the first day of the month. Type `promotional` and press **Enter**. The left panel lists every loaded article mentioning promotions; click a headline to jump to the full card on the right.

Step 4 — Read an article and follow tagged companies

News Results — article cards with headlines and company tags

Callout	What it is	What to do
①	Article headline	Click to open the publisher's story in a new tab.
②	Sentiment area	Hover a tagged company link for relevance and Bullish/Bearish/Neutral score.

When articles are loaded, each card in the right column shows:

CONFIDENTIAL

Coresight Research — Internal Use Only

Page 110 of 221

Element	Description
Source	Publisher name (for example Benzinga, Reuters)
Date	Publication date plus relative time (for example “2 hours ago”)
Headline	Opens the original article in a new browser tab
Summary	Short excerpt from the story
Tagged companies	Companies mentioned in article metadata

Hover a **tagged company** link for a tooltip such as:

Relevance: 85.0% | Sentiment: Bullish (0.42)

- **Relevance** — how strongly the article relates to that ticker (higher = more on-topic).
- **Sentiment** — Bullish, Bearish, or Neutral, with a numeric score.

Companies in MDP’s directory appear as **red links** → **Market Data Dashboard**. Unknown tickers appear as gray tags (not linked).

Real examples

“Morning news sweep before stand-up”

1. Open **News**.
2. Confirm **Sort** → **Latest** and the default week.
3. Set **Sector** to your coverage area (for example **Consumer Cyclical**).
4. Scroll the right column; open interesting stories via the headline link.

“Find inventory commentary across my coverage list”

1. On Screening, confirm your **Top 20 Retail** watchlist exists.
2. In Newsroom, set **Watchlist** → **Top 20 Retail**.
3. Widen **From** to the start of the quarter.
4. Search and press **Enter**.

5. Note tagged companies and sentiment before opening Market Data for follow-up.

“Quick sentiment check on Walmart”

1. Load a week of news with **Sector** → **All** or a retail-focused sector.
2. Find an article tagging **Walmart (WMT)**.
3. Hover the tag for relevance and sentiment.
4. Click **Walmart** to open WMT financials in a new workflow while keeping the article open in another tab.

Try it yourself

1. Open **News** and set **From** to thirty days ago.
2. Search and press **Enter**.
3. Click the first hit in the left **Search News** panel.
4. Open one headline in a new tab, then click a red company tag and confirm Market Data opens for that ticker.
5. Switch **Sort** → **Earliest** and notice the timeline order change.
6. Select a watchlist (if you have one) and confirm the feed narrows to those tickers only.

Empty or loading states

Message	Meaning	What to do
<i>Loading news articles...</i>	MDP is fetching stories for your dates	Wait a few seconds
<i>No news articles found for the selected filters</i>	No stories match dates + filters	Widen From , set Sector to All , clear Search
<i>No matches for 'keyword' in the N most recent articles</i>	Search ran but nothing matched	Try a broader keyword or widen the date range
Left panel: <i>Type a keyword above...</i>	No search submitted yet	Enter a term and press Enter

Tips & gotchas

- **Widen dates first** if the feed looks empty — search only covers articles loaded for the current range.
- **Category** and **watchlist** filters combine — all active filters must pass for an article to appear.
- Headlines always open the **external publisher**; MDP does not host full article text.
- Articles from some sources without sector metadata may appear only under **All** or **Unknown Sector**.
- Your last **category** choice is remembered between visits on the same browser.

Quick reference

I want to...	Do this
Find news about a theme	Enter keyword → press Enter → use left panel
Limit to my coverage list	Watchlist → pick list from Screening
See only one sector	Sector → pick sector name
Open a company's financials	Click a red tagged company link
Read the full story	Click the headline (new tab)
Change time order	Sort → Earliest or Latest

Where to go next

- [Navigation overview](#) — Map of every MDP menu item

— End of Newsroom — Business User Guide —

PART 8 OF 17

Earnings Calls — Business User Guide

Earnings transcript search, PDF download, and watchlist scope.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: Earnings Calls

URL path: `/earnings_calls`

Executive summary

Earnings Calls is MDP's transcript library. Read full **earnings call transcripts** quarter by quarter, search for keywords inside one call or **across hundreds of calls at once**, download **PDFs**, and export keyword hits to **Excel**. Arrive from **Earnings Calendar** with the right company and quarter already selected.

Who this is for

Audience	Typical use
Equity research analysts	Read management commentary after a report; verify quotes
Sector strategists	Search all companies for a theme before writing a note
Associates	Download a PDF for offline reading or internal notes
Earnings-calendar users	Jump from a calendar event straight into the matching transcript

What you'll learn

- How to pick **one transcript** (company + year + quarter)
- How **cross-transcript search** works when any filter is set to **ALL**
- How to use **watchlist scope** to limit universe-wide searches
- How to **download PDFs** and export keyword results

What you can do here

- Select a company, fiscal **year**, and **quarter** to read one full call
- Search within that call for words such as `guidance`, `margin`, or `shrink`
- Set **Company**, **Year**, or **Quarter** to **ALL** to search across many transcripts

- Restrict cross-search to a **watchlist** from Screening
- **Download** a PDF of the full transcript
- Export keyword hits to **Excel** when results are available

Page layout at a glance

The page splits into two matched panels:

Area	What it does
Search + filters (left)	Keyword box, company, fiscal year, and quarter
Search results (left, below filters)	Keyword hits with snippets; click View → to open the passage in the transcript
Transcript viewer (right)	Full call text by speaker, or PDF viewer for select non-US companies

Step-by-step walkthrough

Step 1 — Open Earnings Calls

1. Sign in to MDP.
2. Click **Earnings Calls** in the top navigation bar.
3. Wait for the company list and filters to finish loading (large environments may take 10–30 seconds on first visit).

Filters **remember your last choices** between visits on the same browser.

The screenshot displays the 'Earnings Calls' section of the Market Data Portal. At the top, a navigation bar includes links to 'Market Data Dashboard', 'Earnings Calls', 'Earnings Calendar', 'Screening', and 'News', along with a 'Logout' button. The main header features the 'CORESIGHT MARKET DATA Earnings Calls' title. Below this, a search interface allows users to filter by 'Company' (set to 'Target Corporation (TGT)'), 'Year' (set to '2006'), and 'Quarter' (set to 'Q4'). A 'Search Transcript' panel on the left prompts users to enter keywords. The central transcript content area shows a call transcript for 'Target Corporation (TGT)' for '2006 - Q4', featuring a section by 'Bob Ulrich' with a detailed earnings call transcript. A 'Download' button is available for the transcript. The footer contains the 'CORESIGHT RESEARCH' logo, social media links, and four columns of links: 'LEARN MORE' (Research Subscriptions, Our Events, About Us), 'GET IN TOUCH' (Become a Client, Contact Us), 'QUICK LINKS' (Research Portal, The RetailStic Podcast, AI Council), and a 'Log out' button.

Earnings Calls — full page layout

Step 2 — Read one transcript (single-call mode)

Best for: Deep reading of a single earnings call.

1. **Company** — Pick one company, for example **Apple Inc. (AAPL)**.
2. **Year** — Choose the fiscal year, for example **2024**.
3. **Quarter** — Choose **Q1**, **Q2**, **Q3**, or **Q4**.
4. The right panel shows the full transcript formatted by speaker (Operator, CEO, CFO, analysts, etc.).
5. Optionally type a keyword in **Search** to highlight mentions in the left results panel.

6. Click **View** → on a left-panel hit to scroll the right panel to that speaker section.
7. Click **Download** on the right to save a PDF of the full transcript.

Example — verify a CEO quote

You recall Tim Cook commenting on **services growth** on Apple's Q4 call. Select **AAPL · 2024 · Q4**, search , and jump directly to his remarks without scrolling the entire document.

Carol Schumacher

Good morning. This is Carol Schumacher in the investor relations department at Wal-Mart Stores. We appreciate you calling us today for more information on both our fourth quarter and fiscal year 2007 results. The replays of this call and related materials as to the quarter and year end results for the fiscal year ended January 31, 2007 are available on our website. Here is the agenda for today's call: Lee Scott, our President and CEO of Wal-Mart Stores, will provide an overall assessment on the company's performance and the direction that we are heading for the new fiscal year. Tom Schoewe, Executive Vice President and Chief Financial Officer, will give you the details behind the consolidated numbers for the fourth quarter, as well as overall fiscal 2007. Tom also will come back and close the call with the outlook for the first quarter of fiscal 2008. Charles Holley, now Executive Vice President of Finance and Treasurer, will cover the details on both Wal-Mart U.S. and SAM'S CLUB. Our guest executive is Mike Duke, Vice Chairman Responsible for International, who will give the results and more insight on our operations outside the United States. The store counts and square footage updates are available on our website. We will not be giving those details on the call today. Let me remind you that all references to continuing operations reflect the disposition of Wal-Mart Germany and Wal-Mart South Korea, both of which occurred during the third quarter of the fiscal year just ended. As always, the investor relations team is available to take your calls and questions. Now, we would like to start off with Lee Scott.

Earnings Calls — year, quarter, and transcript

Step 3 — Search across all transcripts (cross-search mode)

Best for: Thematic research across your coverage universe.

1. Set **Company** → **All Companies** (or set **Year** or **Quarter** to **ALL**).
2. Enter a keyword — for example `artificial intelligence` or `shrink`.
3. The left panel fills with paginated hits: company, year, quarter, and a speaker snippet.
4. Click **View** → on any row to open that full transcript with the keyword highlighted.
5. Use **Show more** ↓ at the bottom to load additional pages of results.

The right panel shows brief instructions until you open a specific hit — this is normal in cross-search mode.

Example — sector thematic scan

A retail strategist sets all filters to **ALL**, searches `shrink`, and reviews hits across apparel and grocery names ahead of a loss-prevention note. Each **View →** opens the source call in context.

Earnings Calls — keyword search results

Step 4 — Limit cross-search to a watchlist

When **Company**, **Year**, and **Quarter** are all **ALL**, a **Watchlist** dropdown appears above the filters.

Setting	Effect
— No watchlist —	Searches every transcript in MDP
Your watchlist	Limits results to tickers on that list (from Screening)

Example — coverage list only

CONFIDENTIAL

Coresight Research — Internal Use Only

Page 121 of 221

Your “Large Cap Retail” watchlist has 18 names. Cross-search `inventory` with that watchlist selected — results include only those 18 companies, not the full database.

Step 5 — Download and export

Action	When available	Output
Download (right panel)	Single transcript loaded	PDF of the full call in your browser
Excel export	Keyword search returned hits	Spreadsheet of matching segments

Excel columns (cross-transcript): Company, Ticker, Year, Quarter, Reporter Name, Whole Paragraph.

Large cross-exports may run in the background; a download link appears when ready.

Transcript types

Standard (US SEC) transcripts

- Right panel shows **speaker-labeled text** — each block starts with the speaker name followed by their remarks.
- Report date and fiscal period appear in the header when available from the earnings calendar.
- Keyword search highlights matches in red.

Non-US / PDF-only transcripts

Some international companies provide transcript **PDF files** instead of plain text. MDP opens an in-page PDF viewer. Keyword search works **page by page**, and you can download the original PDF. Search results may include a **page number** — the viewer scrolls to that page automatically.

Arriving from Earnings Calendar

If you click **View Transcript** on the calendar, MDP opens Earnings Calls with:

- The correct **ticker**, **year**, and **quarter** pre-filled
- The full transcript ready on the right

You can immediately search within that call or download the PDF.

Real examples

“Read Nike’s latest call end-to-end”

1. Open **Earnings Calls**.
2. Select **Nike (NKE)** → most recent **Year** → most recent **Quarter**.
3. Scroll the right panel; use **Download** if you need a PDF.

“Find every mention of DTC in one quarter”

1. **Company** → **Nike (NKE)**, **Year** → **2024**, **Quarter** → **Q3**.
2. **Search** → **DTC**.
3. Click **View** → on the first hit; the right panel scrolls to that speaker and highlights “DTC” in red.

“Search all transcripts for shrink”

1. Set **Company** → **All Companies** (leave Year and Quarter at **ALL** or narrow as needed).
2. Search **shrink**.
3. Paginate with **Show more** ↓ and open the most relevant hits with **View** →.

Try it yourself

1. Open **Earnings Calls** and select **Apple Inc. (AAPL)**, **2024**, **Q4**.
2. Search **iPhone** and open the first left-panel hit with **View** →.
3. Download the PDF from the right panel.
4. Switch to cross-search: set **Company** → **All Companies** and search **guidance**.

5. If you have a watchlist, repeat the search with that watchlist selected and compare result counts.
6. From **Earnings Calendar**, click **View Transcript** on any event and confirm filters pre-fill correctly.

Empty or loading states

Message	Meaning	What to do
<i>Loading earnings call data...</i>	MDP is loading company list and transcript metadata	Wait; retry if it persists
<i>No earnings call data available</i>	Transcript database unreachable or empty	Retry later or contact your Coresight administrator
Right panel: <i>Search Across Transcripts</i>	You are in ALL mode without opening a hit yet	Type a keyword or click View → on a left-panel result
<i>PDF not yet loaded</i>	Non-US PDF still downloading	Wait a moment and search again

Tips & gotchas

- Cross-search is powerful but broad — add a **Watchlist** to keep results relevant.
- Short keywords (one or two letters) may return noisy hits; prefer full words like `margin` over `m`.
- For PDF transcripts, note the **page number** in search results.
- Filters cascade: changing **Company** updates available years and quarters.
- Published transcripts here remain the **canonical source** when available; see [Live Earnings Transcript](#) only for audio you supply yourself.

Quick reference

I want to...	Do this
Read one full call	Company + Year + Quarter → scroll right panel
Find a word in one call	Set filters → Search → click left-panel hit
Search all companies	Set any filter to ALL → Search
Limit search to my list	ALL mode → choose Watchlist
Save offline	Download on the right (PDF)
Export hits to Excel	Run keyword search → use Excel control when shown
Open from calendar	View Transcript on Earnings Calendar

Where to go next

- [Earnings Calendar](#) — See who reports when; link to transcripts
- [Market Data Dashboard](#) — Financials after reading management commentary
- [Screening](#) — Build watchlists for scoped transcript search

— End of Earnings Calls — Business User Guide —

PART 9 OF 17

Earnings Calendar — Business User Guide

Earnings calendar views, filters, and email alert preferences.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: Earnings Calendar

URL path: /earnings_calendar

Executive summary

The **Earnings Calendar** shows **when companies report earnings** — past and upcoming — on an interactive calendar. It overlays select **mergers and acquisitions (M&A) closing dates** so you can see corporate events in one place. Click any event for **EPS actual vs. forecast**, links to the **transcript** or **webcast**, and configure **email reminders** before report dates.

Who this is for

Audience	Typical use
Sector leads	Plan the week around cluster reporting days
Research associates	Pull EPS surprise and transcript links before writing notes
Coverage analysts	Filter to one company or a watchlist from Screening
Anyone who wants reminders	Set email alerts days before earnings for companies, sectors, or lists

What you'll learn

- How **Month Wise** and **Year Wise** views differ
- How **legend chips** filter Q1–Q4 earnings and M&A events
- How the **event detail panel** links to transcripts and webcasts
- How to configure **email alerts**

What you can do here

- See **who reports this week or this month** on a color-coded calendar
- Switch between **month view** and **year view** for planning
- Filter to **one company** or a **watchlist**

- Toggle event types (Q1–Q4, M&A completions) with legend chips
- Click an event for EPS, market cap, **View Transcript**, and **Webcast** links
- Set **email reminders** before earnings dates

Page layout at a glance

The page includes a toolbar, color legend, calendar grid, and optional detail panel:

Callout	Area	What it does
①	Toolbar	Email alerts, company filter, watchlist filter, month/year toggle
②	Legend chips	Turn event types on or off (Q1–Q4 earnings, M&A completions)
③	Calendar + detail panel	Click a day's event to open company details on the right

Step-by-step walkthrough

Step 1 — Open Earnings Calendar

1. Sign in to MDP.
2. Click **Earnings Calendar** in the top navigation bar.

3. Wait for events to load — a summary line may report totals such as *"1,240 events · 412 companies · 38 M&A completions"*.

QUICK LINKS

Earnings Calendar — month view with events

Callout	What it is	What to do
①	Company filter	Limit the calendar to one ticker or leave All Companies .
②	Month Wise toggle	Switch between month grid and year overview (use Month Wise for the view above).
③	Calendar grid	Click a day's event chips to open details on the right when the detail panel is visible.

Step 2 — Use the toolbar

Email Alerts

Opens a dialog titled **“Email alerts for upcoming earnings calls.”** A small pill next to the button shows **Alerts on** or **Alerts off** for your account.

See [Email alerts dialog](#) below.

Company filter

Setting	Effect
All Companies	Every name on the calendar (default)
One company	For example Target Corp (TGT) — only that ticker’s events

If you arrived from another page with a ticker in the URL, MDP remembers the ticker context when you change filters.

Example — one-name focus

You are writing ahead of **Costco (COST)** earnings. Set **Company → Costco Wholesale Corp (COST)**. The calendar shows only Costco’s Q1–Q4 report dates and any related M&A markers for that symbol.

Watchlist filter

Setting	Effect
— No watchlist —	No list restriction (default)
Your watchlist	Events for companies on that Screening list only

Disabled if you have no watchlists yet — create one on **Screening** first.

Example — Monday team stand-up

Your “Weekly Earnings” watchlist has 12 reporting names this month. Select it in **Watchlist** to hide everyone else from the grid.

Month Wise / Year Wise

Button	View	Best for
Month Wise	Single month grid (with optional list view inside the calendar)	Day-to-day planning — “who reports Thursday?”
Year Wise	Twelve mini-months on one screen	Seasonal planning, annual coverage maps

Use the calendar’s own **Prev / Next / Today** controls to move between months or years.

Earnings Calendar — toolbar and Month Wise grid

Step 3 — Filter by event type (legend chips)

Five clickable chips sit below the toolbar:

Chip	Color (active)	Shows
Q1	Dark blue	First fiscal quarter earnings reports
Q2	Green	Second quarter reports
Q3	Purple	Third quarter reports
Q4	Gold	Fourth quarter reports
M&A Completion	Coresight red	Deal closing dates from key developments data

- **Filled chip** = that type is **visible**.
- **Outlined chip** = that type is **hidden**.
- Click a chip to toggle it. The calendar refreshes immediately.

Example — earnings only, no M&A

Turn off **M&A Completion** so only quarterly earnings dots appear — useful when the M&A overlay clutters a busy week.

Example — single quarter season

During US retail Q4 reporting season, turn off Q1–Q3 and leave **Q4** on to see only fourth-quarter report dates.

If everything is filtered off, MDP shows: *“No events match the selected filters. Click a color in the legend above to show more.”*

QUICK LINKS

Earnings Calendar — legend chips and day markers

Step 4 — Click an event for details

Click any event to open the **detail panel** on the right.

Earnings events show:

Field	Description
Company name & ticker	With quarter color dot
Earnings date	Report date on the calendar
Report time	When available (pre-market / after close)
Fiscal quarter end	Period end date
Market cap	Formatted market capitalization
EPS actual	Reported earnings per share
EPS forecast	Consensus estimate
EPS surprise %	Actual vs. forecast, when both exist
Transcript	View Transcript → opens Earnings Calls for that quarter
Webcast	Webcast → company investor relations page (new tab)

M&A completion events show:

Acquirer, target, deal type, transaction value, announce/close dates, and source link.

Click **×** **Close** at the bottom of the detail panel to return the calendar to full width.

Example — from calendar to transcript

You click **Walmart · Q4 2024** on the calendar, review **EPS surprise** in the panel, then click **View Transcript** to read management commentary on Earnings Calls.

Email alerts dialog

Open with **Email Alerts** in the toolbar.

Reminders on/off

- Toggle **Send me email reminders** to enable or disable all alerts.

- When enabled, choose how many **days before the earnings date** to notify you (0–60 days). Reminders send at **8:00 AM UTC**.

Coverage — three modes

Pick one mode with the horizontal radio buttons:

Select Companies

- **All companies** — every name on the calendar.
- **Specific companies** — search and multi-select individual tickers.

Select Sectors

- **All sectors** — every sector represented on the calendar.
- **Specific sectors** — pick one or more sectors; MDP shows how many calendar companies match.

Select Watchlist

- Choose one watchlist from Screening.
- Hint text shows how many companies are on that list.

Click **Save** to store preferences. MDP sends a confirmation email when settings change.

Example — personal reminder workflow

A sector head enables reminders **2 days before** earnings for the **Consumer Discretionary** sector only. They receive email the morning before each covered name reports.

Real examples

“Weekly earnings prep”

1. Open **Earnings Calendar**.
2. Confirm **Month Wise** view; navigate to the current week.
3. Optionally filter by **Watchlist**.
4. Click each reporting name for EPS history and **View Transcript**.

“Annual planning map for client deck”

1. Click **Year Wise**.
2. Scan twelve months for cluster weeks.
3. Use legend chips to isolate **Q4** reporting season.
4. Screenshot the year view for seasonal reporting slides.

“Set-and-forget alerts for my coverage”

1. Click **Email Alerts**.
2. Enable reminders; set **3 days before**.
3. Choose **Select Watchlist** → your coverage list → **Save**.

Try it yourself

1. Open **Earnings Calendar** in **Month Wise** view and navigate to the current month.
2. Turn off **M&A Completion** and confirm only quarterly earnings remain.
3. Select one company from the **Company** dropdown and verify the grid narrows.
4. Click any event and read **EPS actual**, **EPS forecast**, and **EPS surprise %**.
5. Click **View Transcript** and confirm Earnings Calls opens with the correct quarter.
6. Open **Email Alerts**, enable reminders for a watchlist, and **Save**.

Empty or loading states

Message	Meaning	What to do
<i>Loading earnings calendar...</i>	Fetching tickers and events	Wait up to 30 seconds
<i>No earnings calendar data found</i>	Calendar database empty or unreachable	Retry later
<i>No events match the selected filters</i>	Legend + company/watchlist filters exclude everything	Re-enable legend chips or widen filters
Watchlist disabled	No watchlists on your account	Create one on Screening

Tips & gotchas

- **Company**, **watchlist**, and **legend** filters combine — all must allow an event for it to appear.
- **View Transcript** passes the correct year and quarter to Earnings Calls automatically.
- **Year Wise** is ideal for screenshots showing reporting seasonality.
- Email alerts use your **corporate email** on file with Coresight sign-in.
- Days with many events show a **" + more "** link — click to expand.

Quick reference

I want to...	Do this
See this month's reporters	Month Wise → navigate with Prev/Next
See the full year	Year Wise
One company only	Company dropdown
My coverage names only	Watchlist dropdown
Hide M&A dots	Turn off M&A Completion chip
EPS and surprise	Click event → read detail panel
Read the call	View Transcript in detail panel
Email before reports	Email Alerts → configure → Save

Where to go next

PART 10 OF 17

Live Earnings Transcript — Business User Guide

Live earnings transcript display during active calls.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: Live Earnings Transcript

URL path: `/live_earnings_transcript`

Executive summary

Live Earnings Transcript turns **recorded earnings call audio** into text you can read, copy, and export. Use it when you have a webcast recording or short audio clip and need a transcript quickly — for example before the call appears in the main **Earnings Calls** library. Text appears **after each audio clip finishes processing**, not word-by-word while someone is still speaking.

Who this is for

Audience	Typical use
Research analysts	Transcribe a recording when the official transcript is not yet published
Associates	Capture a short CEO quote from a mic clip during a live listen
Power users	Export Markdown , plain text, or JSON for downstream tools

What you'll learn

- When to use **browser mic** vs **file upload**
- How **Call Setup** metadata labels exports
- How the **Transcript Stream** stacks completed segments
- What this page is **not** (vs. the canonical Earnings Calls library)

What you can do here

- Enter **company ticker**, **quarter**, and **fiscal year** for labeled exports
- Record a **short segment** with the browser microphone
- **Upload** a WAV, MP3, M4A, or similar file for a full one- to two-hour call
- Add optional **Call context** (speaker names, product terms) to improve spelling

- **Start / End** a session timer; **Clear** to reset
- **Download** completed text as MD, TXT, or JSON

Page layout at a glance

The page splits into a **Call Setup** panel (left) and **Transcript Stream** (right), with session stats across the top.

Panel	Purpose
Session stats bar	Track segment count, word count, and elapsed timer.
Call Setup (left)	Enter company, quarter, year, and transcription settings.
Transcript Stream (right)	Read completed segments; export MD/TXT/JSON when content exists.
Whisper settings	Choose backend, model, device, and language for transcription.

Step-by-step walkthrough

Step 1 — Open Live Earnings Transcript

1. Sign in to MDP.
2. Navigate to **Live Earnings Transcript** (direct URL `/live_earnings_transcript` or from a link that includes `?ticker=...`).
3. Read the subtitle under the page title — it explains that **browser mic** suits short capture and **file upload** suits full calls.

The pill on the right shows **Timer off** or **Timer on (not live captions)**. The timer is for your reference; it does **not** mean words are streaming live.

Transcript Stream

Transcript text appears here after each file or finished mic clip is transcribed — not during recording.

> Pipeline log (verify transcription)

No segments yet. After each mic upload or file upload finishes transcribing, text shows here. Nothing streams live while you talk — only completed chunks.

Live Earnings Transcript — Call Setup and stream

Step 2 — Fill in Call Setup

Company / ticker

Enter the symbol — for example `AAPL` or `TGT` . MDP uses this in exports and saved transcript titles.

If you opened the page from another MDP screen with a ticker in the URL, the field may pre-fill.

Quarter and fiscal year

Field	Purpose
Quarter	Q1, Q2, Q3, or Q4
Fiscal year	Four-digit year (defaults to the current calendar year)

These labels appear in exported filenames — for example `AAPL_2024Q1_live_transcript.md`.

Transcript Stream

Transcript text appears here after each file or finished mic clip is transcribed — not during recording.

> Pipeline log (verify transcription)

No segments yet. After each mic upload or file upload finishes transcribing, text shows here. Nothing streams live while you talk — only completed chunks.

Live Earnings Transcript — Call Setup fields

Transcription backend

Option	When to use
Local faster-whisper	Default; runs on the server
OpenAI API	When your organization has configured an API key and you want cloud models

Additional settings appear based on your choice (model size, device, language). Most business users can leave defaults.

Call context (optional)

Free-text notes — known speaker names, product lines, acronyms. This helps the engine spell company-specific terms correctly.

Example

For a Costco call, enter: CEO Ron Vachris, CFO Richard Galanti, membership fee, Kirkland Signature .

Step 3 — Add audio

Use the **Add audio** selector under **Audio Segment**:

Microphone (browser recorder)

- Record a **short clip** directly in the browser.
- After you **stop** recording, return to the page; MDP shows **Audio ready** and transcribes the clip.
- Suitable for quick capture — **not** recommended for an entire two-hour call (browser limits, tab focus, and upload size).

Upload audio file from computer

- Choose a file — WAV, MP3, M4A, WebM, OGG, or FLAC.
- Best for **full call recordings** exported from Zoom, Teams, or a dedicated recorder.
- Very large files may take several minutes to process.

Example — full call workflow

1. Record the Walmart Q4 webcast locally as WMT_Q4_2024.mp3 .
2. Open **Live Transcript**, enter **WMT, Q4, 2024**.
3. Set **Add audio → Upload audio file from computer**.
4. Select the file and wait for the status spinner to finish.
5. Read segments on the right; download **TXT** for your notes.

Step 4 — Control the session

Button	Action
Start	Starts the elapsed timer (status pill turns on)
End	Stops the timer only — does not delete transcribed text
Clear	Removes all segments and resets the session

Start only affects the timer — you can upload audio whether the timer is on or off.

If upload seems stuck:

- Click **Reload run (pick up upload / refresh widgets)**.
- Or switch **Add audio** mode and re-select the file.
- Expand **Pipeline log** at the bottom of the left panel for status lines.

Transcript Stream

Transcript text appears here after each file or finished mic clip is transcribed — not during recording.

> Pipeline log (verify transcription)

Empty stream

No segments yet. After each mic upload or file upload finishes transcribing, text shows here. Nothing streams live while you talk — only completed chunks.

Live Earnings Transcript — pipeline log and empty stream

Step 5 — Read and export the Transcript Stream

Empty state (no audio processed yet)

When no segments exist, the right panel shows:

No segments yet. After each mic upload or file upload finishes transcribing, text shows here. Nothing streams live while you talk — only completed chunks.

This is **normal** — MDP is not a live closed-caption feed.

After transcription

Each segment appears as a block with:

- Segment number
- Timestamp when the clip was processed
- Which transcription backend and model were used
- The transcribed text

Segments stack in order so you can read the call chronologically across multiple uploads.

Export downloads

When at least one segment exists, download buttons appear:

Format	Use case
Download MD	Markdown for internal wikis or note tools
Download TXT	Plain text for email or Word
Download JSON	Structured data for downstream tools

Filename pattern: `{TICKER}_{YYYYQn}_live_transcript.{ext}`

Example — share with a colleague

After transcribing a call tagged `ROST Q3 2024`, download **TXT**. The file name `ROST_2024Q3_live_transcript.txt` identifies the source.

Real examples

“Quick quote capture (short mic clip)”

1. Enter ticker and quarter.
2. **Add audio → Microphone.**
3. Record the CEO’s answer to one analyst question (under ~3 minutes).
4. Stop recording; wait for transcription.

5. Copy text from the segment block.

“Full call from a Zoom export”

1. Enter metadata and optional **Call context**.
2. **Add audio → Upload**.
3. Select your exported file; wait for processing (long files take longer).
4. **Download TXT** or **MD** when complete.

“Multi-part manual capture”

1. Upload or record **segment 1** → wait for text.
2. Upload **segment 2** → text appends below segment 1.
3. Repeat until the call is covered; export once at the end.

Try it yourself

1. Open **Live Earnings Transcript** and set ticker **TGT**, quarter **Q4**, fiscal year **2024**.
2. Add **Call context** with two executive names and one product term.
3. Record a 30-second mic clip or upload a short test audio file.
4. Wait for a segment to appear in **Transcript Stream**.
5. Download **TXT** before clicking **Clear**.
6. Compare this workflow to opening the same quarter on **Earnings Calls** when the official transcript exists.

What this page is not

Expectation	Reality
Live ticker-style captions during the call	Text appears only after each clip is uploaded and processed
Automatic refresh from a live webcast URL	You must provide audio via mic or file upload
Guaranteed speaker names	Speaker labels are empty unless you add context notes; text is continuous per segment
Replacement for official Earnings Calls library	Published transcripts on Earnings Calls remain the canonical source when available

For published transcripts already in MDP, use [Earnings Calls](#) — search, PDF download, and cross-company keyword search are richer there.

Tips & gotchas

- **Clear** wipes everything; export before clearing if you need to keep text.
- Add **Call context** with ticker symbols and executive names to reduce spelling errors on financial terms.
- For hour-long files, prefer **upload** over dozens of short mic clips.
- Audio is **not stored as files on the server** after processing — only the transcribed text is kept in your session.
- Expand **Pipeline log (verify transcription)** if a clip returns empty text; **Run environment check** confirms server dependencies (primarily for support).

Quick reference

I want to...	Do this
Transcribe a short clip	Mic mode → record → stop → wait
Transcribe a full recording	Upload mode → select file → wait
Label the call	Set ticker, quarter, fiscal year
Improve spelling	Fill Call context with names and terms
Save the text	Download MD / TXT / JSON
Start over	Clear (export first if needed)
Official published transcript	Use Earnings Calls instead

Where to go next

- [Earnings Calls](#) — Canonical transcript library with search and PDF
- [Earnings Calendar](#) — Report dates and links to published transcripts
- [Navigation overview](#) — Full portal map

— End of Live Earnings Transcript — Business User Guide —

PART 11 OF 17

Company Filing Documents — Business User Guide

Browse SEC filings, metric search, and PDF viewer.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: Company Filing Documents

URL path: `/company_filings`

Executive summary

Company Filing Documents is MDP’s filing library for covered retailers and brands. Open **SEC** reports (10-K, 10-Q, 8-K) and **non-SEC** annual or interim PDFs in one screen, **search for financial metrics** (for example revenue or store count), **jump to keyword matches** in the narrative, and **read or download** the full document — without leaving the portal.

Who this is for

Audience	Typical use
Equity research analyst	Pull revenue, comparable sales, or segment metrics from a 10-K or 10-Q
Sector specialist	Compare wording across filings using keyword search
Client-facing teams	Download the official filing PDF for a deck or email
Any signed-in MDP user	Browse filings for companies in Coresight coverage

What you’ll learn

- How the **four top filters** choose which filing you are viewing
- How **metric search** differs from **keyword search** in the left panel
- How **View in Document** scrolls the reader to the exact line or page
- How to open filings from **Market Data** with one click

What you can do here

- Pick a **company**, **document type**, **year**, and (for 8-K / 6-K) **filing unit**
- Search **structured metrics** — revenue, operating income, square footage, and more
- Search the **full filing text** for phrases such as *shrink*, *inflation*, or *direct-to-consumer*

- Read **interactive HTML** (US SEC) or **PDF** (many international reports) in the right-hand viewer
- **Download** the filing to your computer
- Share a bookmark such as `/company_filings?ticker=WMT` with colleagues who already have MDP access

No special admin permission is required for standard viewing. The company must exist in MDP's filing library.

How to open Company Filings

Route	Steps
Top navigation	Not a main-menu item — use Market Data or a direct link
Market Data Dashboard	Select a company → click Company Documents (opens this page for that ticker in a new tab)
Direct URL	<code>https://marketdata.coresight.com/company_filings?ticker=SYMBOL</code>
Home	Pick a company on Home, open Market Data, then Company Documents

Page layout at a glance

The screen splits into **two columns**:

Region	Approx. width	Purpose
Left	~30%	Metric search box, metric result cards, keyword hits
Right	~70%	Filing header, document viewer, download

Across the **top of the right column**, four filters define which filing loads.

Company ▼	Document Type ▼	[Filing Unit ▼]	Year ▼
① Search metrics	③ Filing header + Download		
② Metric cards	④ Document viewer (HTML or PDF)		
Keyword hits			

Step-by-step walkthrough

Step 1 — Choose company, document type, and year

What you're seeing: The **Company Filing Documents** title, the **Company** picker, **Document Type** and **Year** dropdowns, and the left **Search Metrics** panel. After data loads, the right side shows the filing header and document body.

How to use it:

1. Open the **Company** dropdown and pick a name such as **Walmart Inc. (WMT)**.
2. Choose **Document Type** — for example **10-K** (annual) or **10-Q-Q1** (first quarter).
3. Choose **Year** — years are listed newest first; the label reflects the **fiscal period** in the filing, not always the calendar year.
4. For **8-K** or **6-K** only, a **Filing Unit** dropdown appears (1, 2, 3...) when multiple event-driven filings exist in the same year. MDP defaults to the latest unit.

Screenshot callouts — filters and search

Callout	What it is	What to do
①	Company dropdown	Searchable list—pick “ Company Name (TICKER) ”; changing company reloads the latest filing on file.
②	Document viewer region	Filing header, Download control, and full document body once loaded.
③	Document Type dropdown	Limit to filing types available for this company (10-K, 10-Q, annual-report, etc.).

Document types you may see

Document type	What it is
10-K	US annual report (SEC)
10-Q-Q1, 10-Q-Q2, 10-Q-Q3	US quarterly reports
8-K, 6-K	Current / event reports — use Filing Unit when several exist in one year
annual-report	Non-US annual PDF
interim-report-Q1 ... Q5, half-yearly	Non-SEC interim or semi-annual PDFs

Example — UK retailer

Select **Burberry Group PLC (BRBY)** → **annual-report** → **2025**. The right panel opens the PDF annual report instead of a US 10-K.

The filter screenshot below shows **Walmart Inc. (WMT)** · **10-K** · **2023** (production capture).

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

☒
Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

For the quarterly period ended April 30, 2026.

or

☐
Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. For the transition period from ____ to _____.

Commission File Number 001-06991

Screenshot 2026-05-15 125340.jpg

WALMART INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

71-0415188

(I.R.S. Employer Identification No.)

1 Customer Drive

Bentonville AR

(Address of principal executive offices)

72716

(Zip Code)

Registrant's telephone number, including area code: (479) 273-4000

Former name, former address and former fiscal year, if changed since last report: N/A

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value \$0.10 per share	WMT	The Nasdaq Stock Market LLC
1.050% Notes due 2026	WMT26A	The Nasdaq Stock Market LLC
1.500% Notes due 2028	WMT28C	The Nasdaq Stock Market LLC
4.875% Notes due 2029	WMT29B	The Nasdaq Stock Market LLC
5.750% Notes due 2030	WMT30B	The Nasdaq Stock Market LLC
1.800% Notes due 2031	WMT31A	The Nasdaq Stock Market LLC
5.625% Notes due 2034	WMT34	The Nasdaq Stock Market LLC
5.250% Notes due 2035	WMT35A	The Nasdaq Stock Market LLC
4.875% Notes due 2039	WMT39	The Nasdaq Stock Market LLC

Company Filings — filters and document viewer

Step 2 — Read the filing and download

What you're seeing: The filing **header bar** (company, document type, year, period chips) and the **Download** control above the document body.

How to use it:

1. Scroll the viewer to read the filing. SEC filings render as **interactive HTML**; many international filings render as **PDF**.
2. Click **Download** to save a copy locally.

3. If the filing was slow to appear, wait for the loading indicator to finish — large PDFs can take 10–30 seconds on first open.

Screenshot callouts — viewer

Callout	What you see	What it does
①	Filing header row	Shows company name, ticker, document type, year chip, period (Annual, Q1, ...), and filing date when available.
②	Download	Saves the filing file to your computer (HTML package for SEC, PDF for most non-SEC).

When you arrive from a metric or keyword hit, a banner such as **"Auto-scrolled to..."** confirms the viewer jumped to the right location.

4.875% Notes due 2039	WMT39	The Nasdaq Stock Market LLC

Company Filings — header and Download

Step 3 — Search for metrics (left panel)

At the top of the left column, type a metric or phrase — for example:

- Revenue
- Comparable store sales
- Operating income
- Square footage

Press **Enter** or wait for MDP to refresh results.

CONFIDENTIAL

Coresight Research — Internal Use Only

Page 161 of 221

What happens

1. MDP searches its **structured metrics library** for the selected company, year, and document type.
2. Each result is a **card** showing metric name, value, statement type, period, and a source badge.
3. Click **View in Document** on any card — the right panel scrolls to and highlights that fact.

Source badges

Badge	Meaning
EDGAR	Pulled from SEC tagged data
CALC	Calculated by MDP — a formula line explains the math
AI	Extracted by AI when the number is not in structured data

The active card shows **“Viewing”** instead of **“View”**.

Example — Walmart (WMT) 10-K

1. Filters: **Walmart Inc. (WMT) · 10-K · 2025**
2. Search:
3. Click **View in Document** on **Total revenues**
4. The viewer scrolls to the revenue line in the filing.

Company Filings — metric search and document body

Step 4 — Search keywords in the full document

Below metric results, MDP searches the **full text** of the filing for your search term.

CONFIDENTIAL

Coresight Research — Internal Use Only

Page 163 of 221

Element	Meaning
KEYWORD HITS IN DOCUMENT	Section header
Hit #1, #2...	Each text match
Snippet	Surrounding sentence with your term highlighted
Page	Printed page (PDF) or location (HTML)
View in Document	Jumps the viewer to that page or paragraph

Example — narrative search

Filters: **Lululemon (LULU) · 10-K · 2024**

Search:

Metric search may return few rows; **keyword hits** list every narrative mention.

Click **View in Document** on **Hit #2** — the PDF jumps to that page with the term highlighted.

Tip: Use **metrics** for numbers and **keywords** for themes (*inflation, shrink, tariff*).

Try it yourself

Exercise A — Find total revenue in the latest annual filing

1. Open (Target).
2. Confirm **10-K** and the latest **Year**.
3. Search in the left panel.
4. Open the top **Total revenue** (or similarly named) card with **View in Document**.
5. **Expected outcome:** The right panel scrolls to Target's revenue disclosure; the card shows **Viewing**.

Exercise B — Compare quarterly vs annual wording

1. Start on **10-K** and search . Note keyword hit count.
2. Switch **Document Type** to **10-Q-Q3** (or the latest quarter available).
3. Search again.

4. **Expected outcome:** Filters reset the search context; new hits reflect the quarterly filing only.

Exercise C — Share a link with a colleague

1. Select **Home Depot (HD)** and wait for the filing to load.
2. Copy the browser URL (`.../company_filings?ticker=HD`).
3. Send it to a colleague with MDP access.
4. **Expected outcome:** They land on the same company; they may still pick document type and year.

Filters and search — how they interact

Action	Effect
Change company , document type , year , or filing unit	Clears the search box and highlight (fresh filing context)
Click View in Document	Keeps search active while the viewer scrolls
Clear search text	Metric list and keyword hits disappear

Tips for analysts

1. **Start with the latest 10-K**, then drill into **10-Q** quarters for detail.
2. **Watch CALC rows** — read the formula before citing calculated figures externally.
3. **Bookmark tickers** — URL parameters carry the company; document type and year stay in the session.
4. **International names** — look for **annual-report** and **interim-report-Q*** instead of 10-K / 10-Q.

Frequently asked questions

Why is my company missing from the dropdown?

The company may not yet be in the filing library. Ask the data team to add coverage, or (admins) add the company in **Retailer Adding** and upload PDFs in **Company Filings File Manager**.

Why does the document type list only show 10-K?

Only types with stored files appear. Quarterly filings may arrive after the annual report is processed.

Why do I see “Not disclosed in this filing”?

The metric is not available for that exact filing. Try keyword search, another document type, or another year.

The PDF looks blank

Wait for the download to finish. Use **Retry Download** if a temporary storage delay message appears.

Where is Company Filings in the menu?

It is reached from **Market Data → Company Documents** or a direct link — not a top-navigation item.

PART 12 OF 17

Company Filings File Manager — Business User Guide

Admin workflow — upload non-SEC filings to the document library.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: Company Filings File Manager

URL path: `/company_filings_add_files`

Executive summary

The **Company Filings File Manager** lets authorized staff **upload non-SEC filing PDFs** into MDP storage, **browse folders**, **download** files, and (with the highest permission) **delete** content. Every upload and delete is **audited** and triggers an **email notification** to the data team. Analysts then open those files on [Company Filing Documents](#).

Environment note: This page is available in **staging and internal** MDP environments. It is not linked from the standard production menu for most users.

Who this is for

Permission level	What you can do
Any signed-in user (when page is reachable)	Open the page and browse folders
Edit (or platform admin)	Upload files and create folder paths
Delete (or platform admin)	Delete individual files, folders, or entire directory trees

Permissions are granted per user in [Access Management](#) under **Company Filings File Manager**.

Default: Everyone can browse when the page is enabled; **upload and delete are restricted** until an admin grants them.

What you'll learn

- The **folder path convention** that matches the filing viewer
- How to **upload** a PDF so analysts see it as `annual-report` or `interim-report-Q1`
- How to **browse and download** existing content
- How **audit email** confirms your action

Why this page exists

US **SEC** filings are ingested automatically. **Non-SEC** and international retailers often publish **annual reports** and **interim reports** as PDFs only. The File Manager is how authorized staff place those PDFs into the same storage layout that [Company Filing Documents](#) reads.

Uploaded files are always stored as `filing.pdf` inside the folder path you specify.

Page layout at a glance

Company Filings File Manager

- ① Current User Context (collapsible) – upload/delete flags
- ② Target Location – folder path + storage preview
- ③ Upload Files – picker, overwrite, Create folder and upload
- ④ Delete folder (Delete permission only)
- ⑤ Browse path → Show folder contents → list with Download

File Manager title

Company Filings File Manager

Create folders/subfolders, upload files, browse, download, and securely audit all activity

> Current User Context

Target Location

Upload form

Folder browser

Folder / subfolder path

Example: BRBY/2025/annual-report or BRBY/2025/interim-report-Q1

Root prefix

(none)

Uploaded file will be saved to: azure-storage-test/filing.pdf

Upload Files

Any selected file will be saved as `filing.pdf`.

Choose a file

 Drag and drop file here
Limit 200MB per file

Browse files

☒ Overwrite existing file

Create folder and upload file

Delete Folder

Folder path to delete

Example: AAPL or AAPL/2024/10-K

This will recursively delete the selected folder and everything inside it.

Type DELETE to confirm

Company Filings File Manager — upload form and folder browser

Step-by-step — upload a non-SEC annual report

Step 1 — Confirm your permissions

Open **Current User Context** (collapsible at the top).

Field	Meaning
Email	Your signed-in address
Upload access	☐ True / ☐ False
Delete access	☐ True / ☐ False

If upload is ☐ False , the file picker and upload button are disabled and you see a message to contact an admin.

Step 2 — Set the target folder path

Control	What to enter
Folder / subfolder path	Ticker and structure — e.g. BRBY/2025/annual-report
Root prefix	Read-only — shared storage prefix (do not edit)

MDP shows a preview such as:

Uploaded file will be saved to:

Path conventions (must match Company Filings viewer)

Document	Example path
Annual report	{TICKER}/{YEAR}/annual-report
Q1 interim	{TICKER}/{YEAR}/interim-report-Q1
Q2 interim	{TICKER}/{YEAR}/interim-report-Q2
Half-yearly	{TICKER}/{YEAR}/half-yearly

Example — Burberry FY2025 annual PDF

Folder path: BRBY/2025/annual-report
 Saved as: filing.pdf

After upload, analysts open **Company Filings** → **BRBY** → **annual-report** → **2025**.

Step 3 — Upload the file

Control	Behavior
Choose a file	Select one PDF from your computer
Overwrite existing file	When checked (default), replaces an existing <code>filing.pdf</code> in that folder
Create folder and upload file	Creates missing folders, uploads, audits, and emails the team

Important: Whatever you upload is **renamed to** `filing.pdf` before save. The success message shows both your original filename and the saved path.

Step 4 — After a successful upload

You will see:

1. A green success message with file size and storage path
2. **Success email sent** — to the data automation team; you are copied if not already on the To list
3. An **audit log entry** (timestamp, your email, action, path)

If email fails, the file is still uploaded; a warning appears.

Browse and download existing files

Browse path

Enter a path prefix, for example:

- `AD` — top level for Adidas folders
- `AD/2024` — all 2024 subfolders
- `TSCO/2024/annual-report` — one report folder

Click **Show folder contents**.

Folder listing

Icon	Type	Actions
Folder	Subdirectory	Delete Folder <i>(Delete users only)</i>
File	<code>filing.pdf</code>	Size, Download , Delete File <i>(Delete users only)</i>

Up to **300 items** display per browse. Narrow the path if the list is truncated.

Example

1. Browse path: `TSCO/2024`
2. See `interim-report-Q1/filing.pdf` and `annual-report/filing.pdf`
3. Click **Download** on the annual report for offline review

Delete folder *(Delete permission only)*

This section is **hidden** unless you have Delete access.

Control	Purpose
Folder path to delete	e.g. <code>TEST/2024</code>
Type DELETE to confirm	Safety check — must type exactly <code>DELETE</code>
Delete folder recursively	Removes the folder and everything inside

This **cannot be undone**. Use only when retiring bad uploads or cleaning test data.

Email notifications

Every successful upload emails:

- The data automation team (standing list)
- **You** (CC) as the uploader

Subject pattern: *Company Filings Upload Success - 1 file*

Body includes: uploader email, container, folder, overwrite flag, original filename, saved path, and size.

Audit trail

All uploads and deletes write to the **filing storage audit log** with:

- Date/time
 - Your email
 - Action (UPLOAD / DELETE)
 - Target path
 - Success or failure message
-

Try it yourself

Exercise — end-to-end non-SEC filing

1. Confirm **Edit** permission on this page in [Access Management](#).
 2. Ensure the company exists in [Retailer Adding](#) (e.g. `BRBY`).
 3. Upload `Burberry_Annual_2025.pdf` to path `BRBY/2025/annual-report` .
 4. Open [Company Filing Documents](#) → **BRBY** → **annual-report** → **2025**.
 5. **Expected outcome:** PDF loads in the viewer; download works.
-

Frequently asked questions

Upload access restricted

Request **Edit** on **Company Filings File Manager** via [Access Management](#).

File not visible in Company Filings

Confirm path matches `TICKER/YEAR/doc-type` and wait a moment; try **Retry Download** on Company Filings.

Deletion cancelled

Re-type `DELETE` exactly in the confirmation box.

Database / storage connection failed

VPN or connectivity issue — contact IT; audits may be disabled until resolved.

PART 13 OF 17

Revenue Forecasting — Business User Guide

Revenue forecasts, model comparison, scenarios, and refresh.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: Revenue Forecasting

URL path: /forecasting

Executive summary

Revenue Forecasting shows **annual** and **quarterly** revenue outlooks for retail companies in MDP coverage. Compare **six statistical models**, read the **ensemble** blend and **pessimistic / baseline / optimistic** scenarios, **export Excel** workbooks, and (if authorized) **refresh** stored forecasts when new actuals arrive.

Who this is for

Audience	Use case
Research analysts	Next-year or next-quarter revenue outlook for a coverage name
Sector leads	Compare model disagreement and scenario bands
Forecast administrators	Run Refresh Data after new financials land (<i>Edit permission</i>)

View access is typical for standard MDP users. **Refresh** actions require **Edit** permission on Forecasting (or an admin role).

What you'll learn

- How **Annual** vs **Quarterly** period changes the entire dashboard
- What the **summary cards** and **Overview / Models / Test** tabs show
- How to read **MAPE** backtest scores and pick a defensible number for external use
- How **Refresh Data** updates one company or the full universe

What you can do here

- Select a **company** (or **All Companies** for bulk Excel only)
- Toggle **Annual** or **Quarterly** forecasts

- Set **forecast horizon** (1–5 years in annual mode)
- Explore charts, tables, model methodology popups, and scenario bands
- **Export Excel** for one company or the full covered list
- **Refresh Data** (*authorized users*) to re-run models when actuals change

Page layout at a glance

Step-by-step walkthrough

Step 1 — Select a company and period

Company selector

Dropdown order:

1. — **Select Company** — (*placeholder*)
2. **All Companies** (*bulk Excel export only — no charts*)
3. Individual companies, e.g. **Tesco PLC (TSCO)**

Selecting a company updates charts and tables. The URL can include `?ticker=TSCO` for bookmarks.

Period — Annual vs Quarterly

Option	What you see
Annual	Fiscal-year history, 1–5 year forward horizon, full model tabs
Quarterly	Quarter-by-quarter history, seasonal models, scenario band on quarters

Switching period reloads the dashboard for the selected company.

Forecast horizon (*Annual only*)

Slider from **1 yr** through **5 yr** (default 5). Controls how many future **years** appear in charts, tables, and Excel export.

Revenue Forecasting — company selector and overview

Step 2 — Read the summary cards

After data loads, five cards summarize the run:

Card	Meaning
Latest Actual Revenue	Most recent reported annual or quarterly revenue
Ensemble — Next Year / Next Quarter	Blended forecast for the upcoming period
Best Forecasting Model	Model with lowest backtest error (MAPE); click for detail
Historical Years / Quarters in Training	How much history fed the engine
Forecast Horizon	How far forward the table extends

Hero chips may show **outlier years excluded** when MDP removed abnormal points (for example pandemic-era distortions) from training.

Step 3 — Overview tab

Forecast overview chart

- **Black solid line** — historical actual revenue (cleaned for outliers)
- **Colored faint lines** — each model's forecast
- **Red dashed line** — **Ensemble** (blend of top models)
- **Shaded band** — pessimistic-to-optimistic scenario range

Hover any year or quarter for exact values.

Forecast table

Rows = forecast periods. Columns = each model + ensemble + scenarios (typically in billions, company reporting currency).

Explore individual models

Row of buttons — one per model. Click to open a **methodology popup** with chart, assumptions, and metrics for that model alone.

Models included

Short name	Full name
Linear Regression	Straight-line trend through history
CAGR	Compound annual growth rate
Exponential Smoothing	Weighted average of past levels
Holt's Linear Trend	Level + trend smoothing
Moving Average Trend	Recent growth averaged forward
Weighted Average Growth	Growth rates weighted by recency
Ensemble	Blend of the three best backtest performers

Step 4 — Models tab

One sub-tab per model with a plain-language explanation and dedicated chart.

Scenarios sub-tab

Three paths from the company's **historical growth distribution**:

Scenario	Typical meaning
Pessimistic	Lower growth percentile (cautious case)
Baseline	Median historical growth
Optimistic	Upper growth percentile

The **Ensemble** line is overlaid for comparison.

Step 5 — Test tab (backtesting)

MDP hides the **most recent holdout periods**, trains each model on earlier data, and scores how well it predicted those hidden periods.

Column	How to read it
MAPE %	Average percentage error — lower is better
Bias	Positive = model tended to overshoot
RMSE	Penalizes large misses (same units as revenue)

The **lowest MAPE** model is labeled “best” in the summary cards. Top three models feed the ensemble.

Rule of thumb (annual)

MAPE	Quality
Under 5%	Excellent
5% – 15%	Acceptable
15% – 25%	Weak
Over 25%	Use with caution — prefer ensemble and scenarios

Quarterly view

When **Period = Quarterly**:

Element	Behavior
Summary cards	Latest quarter actual, next-quarter ensemble, best model
Chart	Historical quarters + per-model lines + scenario band
Table	Quarters as rows, models as columns
Backtest	MAPE by model on quarterly holdouts
Excel	Quarterly Forecast workbook

Minimum data: At least **8 quarters** of revenue history. If unavailable, MDP prompts you to run **Refresh Data → Quarterly**.

Revenue Forecasting — quarterly scenario summary

All Companies mode

Select **All Companies** in the company dropdown.

- No charts — **Excel export only**
- Click **Excel** to build a multi-sheet workbook for **every** covered company
- First click builds the file; download starts automatically

Use for portfolio-wide review or offline sharing.

Excel export (single company)

At the bottom of an individual company view: **Export {Company} ({TICKER}) → Excel**

Workbook typically includes historical actuals, all model forecasts, ensemble and scenarios, backtest scores, and implied growth rates.

Filename pattern: `TSCO_Revenue_Forecasting.xlsx`

Refresh workflow (*authorized users*)

Click **Refresh Data** to open the **Refresh Forecasting Models** dialog.

Refresh Forecasting Models

Period Type

☒ Annual
☐ Quarterly

TICKER	COMPANY NAME	EXCHANGE	REPORTING DATE	FISCAL PERIOD	LAST REFRESH	ACTION
1913.HK	Prada S.p.A.	SEHK	—	Dec 31	May 25, 2026 12:00 UTC	On hold
2020.HK	ANTA Sports Products Limited	SEHK	—	Dec 31	May 11, 2026 12:17 UTC	On hold
2331.HK	Li Ning Company Limited	SEHK	—	Dec 31	May 11, 2026 12:17 UTC	On hold
3382.T	Seven & I Holdings	TSE	Apr 09, 2026	Feb 28	May 11, 2026 12:17 UTC	Refresh Now
3998.HK	Bosideng International Holdings Limited	SEHK	—	Mar 31	May 11, 2026 12:17 UTC	On hold

Refresh All

56 companies on hold. Their annual reporting dates have not been confirmed yet. To keep every forecast aligned to a verified reporting period, automated refresh is paused for them and they are excluded from Refresh All. Refresh re-enables automatically once the reporting date is identified.

Refresh Forecasting Models dialog

Control	Meaning
Period Type	Annual or Quarterly store to refresh
Company table	Ticker, name, exchange, reporting date, fiscal period, last refresh, action
Refresh Now	Re-runs all models for one ticker
Refresh All	Runs every eligible company; on hold names are skipped
On hold	Reporting date not yet confirmed — refresh blocked until fixed

Statuses you may see: **Done**, **Up to date**, or an error message when data is missing.

Banner example: *“3 companies on hold. Their annual reporting dates have not been confirmed yet...”*

Help expanders (top of page)

Optional reference sections (collapsed by default):

- **Glossary** — every label on the page
 - **All formulas** — math behind metrics
 - **How each model is trained** — non-technical walkthrough
 - **MAPE score guide** — interpret accuracy
 - **Worked example** — hand-checkable mini case
-

Try it yourself

Exercise — Tesco annual preview

1. Open **Forecasting** → **Tesco PLC (TSCO)**.
2. Keep **Annual** and **5 yr** horizon.
3. Note **Ensemble — Next Year** on the summary card.
4. Open **Overview** → confirm ensemble vs individual models.
5. Open **Test** → note lowest-MAPE model.
6. Click **Excel** → attach workbook to an internal earnings note.

Expected outcome: Charts and tables populate when forecast coverage exists for TSCO.

Frequently asked questions

No revenue forecast coverage is available

Coverage may be empty in this environment, or the company lacks enough history. Contact the data team or run **Refresh Data** if you have Edit rights.

Models disagree sharply

Normal for volatile names. Prefer **ensemble** and read **scenarios** for a range.

Quarterly tab empty

Insufficient quarter history or quarterly sync not run — use **Refresh Data → Quarterly**.

I do not see Refresh Data

You have view-only access. Request **Edit** on Forecasting via [Access Management](#).

Access Management	Permissions

— End of Revenue Forecasting — Business User Guide —

PART 14 OF 17

Forecasting Admin — Business User Guide

Forecast administration and bulk refresh (admin users).

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: Forecasting Admin

URL path: `/forecasting_admin`

Executive summary

Forecasting Admin is an **internal operator screen** that **syncs stored revenue forecasts** when annual actuals in MDP are newer than the last model run. Use it after large data loads or when analysts report stale numbers on the public [Revenue Forecasting](#) page.

Navigation status — important

Forecasting Admin is not listed in the main MDP navigation menu for most users.

Status	Detail
Page exists	Yes — maintained for forecast operators
Standard top menu	Not linked — users cannot open it from the everyday menu unless your deployment adds it
Direct URL	<code>/forecasting_admin</code> when your account has permission
Access control	Managed in Access Management under Forecasting Admin

What this means for you:

- **Analysts** should use [Revenue Forecasting](#) → **Refresh Data** for day-to-day single-company updates.
- **Platform admins** who need **bulk sync** use Forecasting Admin (or equivalent operator processes).
- Permissions can be granted before the page is added to navigation so teams are ready when it goes live.

Who this is for

Role	Access
Forecast administrator	Allow (or higher) on Forecasting Admin
Platform admin	Full operator access
Standard analysts	No access — use public Forecasting page

Grant access in [Access Management](#) → **Page Permissions** → **Forecasting Admin**.

What you'll learn

- When to use **Admin bulk sync** vs **Forecasting → Refresh Data**
- How **Sync all stale tickers** and **Sync this ticker only** work
- How to read the **results table** after a run

What the page does (plain language)

MDP stores pre-computed model outputs in a **forecast table**. When new **actual revenue** lands:

1. Forecasting Admin compares actuals to the last sync date
2. For **stale** tickers, re-runs the six-model engine
3. Writes fresh forecasts back to storage
4. Clears caches so [Revenue Forecasting](#) shows new numbers immediately

This is the **batch / operator** view. The analyst-facing **Refresh Data** dialog on the Forecasting page uses the **same engine** for individual tickers.

Page layout at a glance

INTERNAL • FORECAST STORE

Forecasting Admin

① Access Control — Page Permissions (admins, collapsed)

② Sync all stale tickers (primary action)

③ Sync this ticker only — text box + button

④ Results table — status per ticker

Screenshot pending — connect to staging data: Only the page header was captured in this environment; sync controls require forecast data and operator permission. Sections below match the live page.

Step-by-step — bulk sync after a data load

Step 1 — Open Forecasting Admin

1. Sign in with an account that has **Forecasting Admin** permission.
2. Navigate to `/forecasting_admin` (bookmark or admin link).
3. Confirm the header reads **Forecasting Admin** with **INTERNAL • FORECAST STORE**.

Step 2 — Sync all stale tickers

Click the large primary button **Sync all stale tickers**.

- Scans **all eligible** companies
- Updates only those whose actuals are newer than the last stored forecast
- Shows a progress indicator with the current ticker
- Displays summary metrics when finished:

Metric	Meaning
Upserted	Tickers freshly written
Already current	No change needed
Skipped / no data	Missing history or excluded
Errors	Failed tickers (see table)

Step 3 — Sync one ticker

Control	Example
Single ticker text box	TSCO
Sync this ticker only button	Runs one company

Use after fixing one name's reporting date or actuals.

Example: Enter after Costco annuals are loaded → click sync → verify on [Revenue Forecasting](#).

Step 4 — Read the results table

Column	Meaning
Ticker	Stock symbol
Company name	Display name
Status	updated , up_to_date , skipped , error
Rows upserted	Count written
Message	Human-readable detail

Access Control expander *(platform admins only)*

Administrators see **Access Control — Page Permissions** collapsed by default.

Inside:

Control	Purpose
Manage permissions for	Dropdown: Forecasting Admin, Retailer Adding, Company Filings File Manager
Stats	Total users, Allow count, Delete count
Add User	Email + permission + Add User
Current Users table	Change permission, Save , Remove

This mirrors [Access Management](#) for quick fixes without leaving the page.

When to use Admin vs Forecasting → Refresh Data

Situation	Recommended tool
One company after earnings	Forecasting → Refresh Data → Refresh Now
Nightly / weekly batch after data load	Forecasting Admin → Sync all stale tickers
New company added to coverage	Single-ticker sync on either page
Reporting date not set	Fix date first — sync stays on hold until then

Both paths call the same underlying sync services and clear forecast caches on success.

Access denied

If your permission was revoked:

Your access to run forecasting sync has been revoked. Contact an admin to restore access.

Contact an IAM admin listed in [Access Management](#).

Try it yourself

Exercise — verify single-ticker sync

1. Open [Revenue Forecasting](#) for **TSCO** and note **Last Refresh** (if shown in Refresh dialog) or ensemble values.
2. In Forecasting Admin, run **Sync this ticker only** → **TSCO**.
3. Return to Forecasting and hard-refresh the browser.
4. **Expected outcome:** Status **updated** or **up_to_date**; numbers unchanged if already current.

Frequently asked questions

Cannot find page in menu

Expected — use direct URL or request navigation to be enabled.

Sync returns **no_data**

Company lacks enough annual history in MDP.

Sync returns **error**

Check the message column — often a missing reporting date or actuals.

Forecasting page still shows old numbers

Hard-refresh the browser after sync completes.

- [Access Management](#) — grant Forecasting Admin access
- [Retailer Adding](#) — add company before first sync

— End of Forecasting Admin — Business User Guide —

PART 15 OF 17

Access Management — Business User Guide

Page-level access control for portal administrators.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: Access Management

URL path: `/access_management`

Executive summary

Access Management is the central place for **Administrators** and **Super Users** to control **who can sign in to MDP** and **which restricted pages each person can use**. Standard research pages (Market Data, Newsroom, Screening, and most others) follow default login access — this screen manages **roles** and **specialist / admin pages** only.

Who can open this page

Role	Access
Admin	Full access — manage all users, all permission levels, delete users
Super User	Manage users (except creating Admins), grant View/Edit on pages — cannot delete users or grant Delete permission
User (standard)	Access Denied — contact an administrator

Fixed platform admins always retain emergency access even if the database is temporarily slow.

What you'll learn

- The difference between **global roles** (Users & Roles tab) and **page permissions** (Page Permissions tab)
- How to **onboard** a colleague and grant **File Manager** or **Retailer Adding** rights
- What **View Only**, **Edit**, and **Delete** mean on restricted pages

What you can do here

Tab 1 — Users & Roles

- Add or update users with **Admin**, **Super User**, or **User** global role

- Filter and review the **All Users** table
- Delete user accounts (*Admins only*)

Tab 2 — Page Permissions

- Grant **View Only**, **Edit**, or **Delete** on restricted pages:
- **Company Filings File Manager**
- **Retailer Adding**
- **Forecasting Admin**

Page layout at a glance

IAM • Access Management — your email + role pill

Tab: Users & Roles | Page Permissions

Users: stat cards → Add User → All Users table → Role cards

Access Management — Users & Roles ACL table

Callout	What it is	What to do
①	IAM · Access Management badge	Confirms you are on the identity and permissions admin page.
②	Users & Roles tab	Manage global MDP roles (Admin, Super User, User).
③	Add User button	Create or update a colleague after filling Email and Role.
④	All Users table	Review, filter, and delete accounts (delete is Admin-only).

CONFIDENTIAL

Coresight Research — Internal Use Only

Page 202 of 221

Tab 1 — Users & Roles

Manage **global MDP roles** (not page-specific).

Summary stat cards

Card	Counts
Total Users	Everyone in the user directory
Admins	Full IAM power
Super Users	Delegated managers
Users	Standard accounts

Add / Update User

Field	What to enter
Email	<code>firstname.lastname@coresight.com</code>
Display name	Optional friendly name
Role	Admin · Super User · User
Add User	Creates or updates the person

Rules

- Only **Admins** can create another **Admin**
- Super Users can add **Super User** or **User**
- Duplicate email updates the existing record

Example: Onboard a new analyst → `jane.doe@coresight.com` → role **User** → **Add User**.

All Users table

Column	Meaning
Email	Login identity
Display Name	Optional label
Role	Admin / Super User / User pill
Since	Date added
Added By	Who created the row
Del	Delete control (<i>Admins only</i>)

Filter dropdown: All Roles · Admin · Super User · User

Delete flow (*Admins only*): Click **Delete** → confirm → you **cannot** delete your own account.

Role hierarchy

Role	Capability summary
Admin	Full access — manage users, grant all permissions, delete users
Super User	Add users and manage page permissions — cannot delete users
User	Standard platform user — no management capabilities

Global role does **not** automatically grant restricted pages. Use Tab 2 for those.

Tab 2 — Page Permissions

Control **restricted MDP pages** only.

Select Page

Display name	What it controls
Company Filings File Manager	Upload/browse/delete non-SEC filing PDFs
Retailer Adding	Edit master company table
Forecasting Admin	Bulk forecast sync operator screen

Note: Revenue Forecasting Refresh Data uses the `forecasting` page permission (managed in the database; not always shown in this dropdown). The three pages above are the ones listed in this UI.

Page permission stats

Four metrics for the selected page: **Total with Access**, **View Only**, **Edit**, **Delete**.

Grant Access

Field	Options
User email	Person to add
Permission	View Only · Edit · Delete (<i>Admin only for Delete</i>)
Grant Access	Saves immediately

Quick-pick a known user — helper dropdown to copy an existing email.

Super User limitation: Can grant **View Only** and **Edit** only. For **Delete**, contact an Admin.

Permission meanings

Level	Typical use
View Only	Open page, browse data, no uploads or saves
Edit	Upload filings, save retailer rows, run forecast refresh
Delete	Remove storage files/folders; highest File Manager right

Current Access table

Column	Action
Email	Who
Permission	Dropdown to change — saves on change
Granted	Last update date
By	Administrator who granted
Revoke	Removes all access to this page

Example — grant File Manager upload to a contractor

1. Tab **Page Permissions**
2. Select **Company Filings File Manager**
3. Email `vendor@coresight.com` → permission **Edit**
4. **Grant Access**
5. User can upload PDFs; still cannot delete unless you grant **Delete**

How MDP checks access (plain language)

When someone opens a restricted page, MDP asks:

1. Are they signed in?
2. Are they a global **Admin**? → usually allowed
3. Is there a row for their email on that page with sufficient permission?

No row often means **denied** (Retailer Adding) or **browse-only default** (File Manager).

Real scenarios

New data analyst — research only

1. **Users & Roles** → add as **User**
2. No page grants needed for Market Data, Company Filings viewer, Forecasting view

Data operations — upload non-SEC PDFs

1. **User** or **Super User** global role
2. **Page Permissions** → Company Filings File Manager → **Edit**

Retail team — maintain company list

1. **Page Permissions** → **Retailer Adding** → **Edit**
2. Without this, user sees: *"This page is restricted. Contact an admin."*

Forecast operator — batch sync

1. **Page Permissions** → **Forecasting Admin** → **Allow**
2. Also grant **Edit** on **Forecasting** for the Refresh Data dialog

Access denied screens

Standard **User** accounts who open `/access_management` see **Access Denied** instead of the IAM panel shown above.

This panel (Access Management itself):

This panel is restricted to Administrators and Super Users only.

Other restricted pages (e.g. Retailer Adding):

This page is restricted. Contact an admin to request access.

Send users to an **Admin** listed in the Users table.

Database unavailable

Yellow banner:

Database connection unavailable — read operations are disabled.

Mutations (add user, grant access) are blocked until connectivity recovers.

Try it yourself

Exercise — grant view-only Retailer access

1. Open **Page Permissions** → **Retailer Adding**.
2. Grant **View Only** to a test colleague email.
3. Ask them to open `/retailer_adding`.
4. **Expected outcome:** Grid loads; **Save** and bulk upload disabled.

Related guides

Guide	Topic
Company Filings File Manager	Upload/delete permissions

Forecasting Admin	Forecasting Admin access
Revenue Forecasting	Refresh Data edit rights

— End of Access Management — Business User Guide —

PART 16 OF 17

Retailer Adding — Business User Guide

Add and maintain retail company master data.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: Retailer Adding (Retailer Manager)

URL path: `/retailer_adding`

Executive summary

Retailer Adding lets authorized staff **add and maintain retail company records** in MDP's master company table. Use the **grid editor** for one-off fixes or **bulk upload** spreadsheets for many new names at once. Every save is **audited** and emails the retail data team.

Environment note: Available in **staging and internal** MDP environments. Not linked from the standard production menu for most users.

Who can use this page

Permission	What you can do
No access row	Page blocked — <i>"This page is restricted. Contact an admin to request access."</i>
View Only	Load and search the grid; no editing, saving, or uploads
Edit (or platform admin)	Edit rows, add rows, bulk upload, download CSV, save changes

There is no default access. Every user must be granted rights in [Access Management](#) → **Retailer Adding**.

Admins and Super Users bypass the check automatically.

What you'll learn

- How to **search and edit** rows in the grid
- The **business key** that must stay unique (ticker + source + exchange)
- How to **bulk upload** from the CSV template
- The **end-to-end workflow** from new company → filing upload → analyst view

What you can do here

- Load up to **1,000** existing company rows into an editable grid
- **Search** loaded rows across all visible columns
- **Save Changes** — update existing rows or insert new blank rows
- **Download** screen data or full SEC + non-SEC reference lists
- **Bulk upload** `.xlsx` or `.csv` files using the official template
- Trigger **audit log** entries and **email notifications** on every save

Page header info

Three read-only fields at the top:

Field	Example
Table	Master companies table
User	Your email
Access	Allowed / restricted message

Page layout at a glance

① Rows to load	② Refresh	③ Search loaded rows
④ Data grid (editable or view-only)		
⑤ Download CSV buttons (Edit only)	⑥ Save Changes	
⑦ Bulk upload schema + template	⑧ Upload	⑨ Insert rows

Download Screen Data (CSV)

Retailer Adding — Retailer Manager grid and bulk upload

Method 1 — Edit existing retailers / add rows directly

Rows to load

Number box (default **500**, range 10–1000). Controls how many existing database rows load into the editor.

Refresh

Reloads data from the database using the current row limit. Use after someone else saved changes or you changed the row limit.

Search loaded rows

Text box filters the grid across **all visible columns**.

Example: Type `grocery` to narrow to grocers in the loaded set.

Caption shows *"Showing X of Y loaded rows"* when filtering.

Data grid

Capability	View Only	Edit
See columns	✓	✓
Edit cells	×	✓
Add blank rows at bottom	×	✓
Primary key column	Read-only	Read-only

Key columns you will often edit

Column	Purpose
ticker	Stock symbol (e.g. <code>TSCO</code>)
name	Company legal or display name
source	<code>SEC</code> or non-SEC source tag
exchange_acronym	e.g. <code>LSE</code> , <code>NYSE</code>
name_coresight	Coresight display name
primary_industry_coresight	Sector classification

Business key: Combination of **ticker + source + exchange_acronym** must be unique. Duplicates in the same save are skipped.

System columns (auto timestamps) are locked.

Download buttons (*Edit only*)

Button	Contents
Download Screen Data (CSV)	Currently loaded/edited grid
Download All SEC + NON_SEC (CSV)	Union of reference company lists

Save Changes

Primary action — commits grid edits.

On save:

1. **Updates** changed existing rows
2. **Inserts** new blank rows you added at the bottom
3. Writes **audit log** entry
4. Sends **email** to the retail data distribution list with row summaries

Messages: *"No changes detected."* or *"3 updated / 2 inserted"*.

Example — fix Tesco exchange

1. Search
2. Change **exchange_acronym** to
3. **Save Changes**
4. Team receives email:

Method 2 — Bulk upload new retailers

Bulk upload schema

MDP shows the **exact column names** required. Download:

Download Bulk Upload Template (CSV) — empty template with correct headers.

Excluded from upload: primary key (database assigns IDs) and system-managed timestamp columns.

Upload bulk file

Control	Accepts
Upload bulk file	<code>.xlsx</code> or <code>.csv</code>

After upload, MDP previews columns and flags **invalid columns** that will be ignored.

Insert Bulk Rows

Inserts every valid row into the master table.

- Skips duplicates already in the database (by business key)
- Skips duplicate rows within the same file
- Emails the team with one line per inserted or skipped row

Example — add three APAC retailers

1. Fill template: `ticker` , `name` , `source` , `exchange_acronym` , ...
2. Upload `apac_new_retailers.xlsx`
3. Review preview table
4. **Insert Bulk Rows** → *"12 rows inserted"*

Email notifications

Automatic emails go to the retail data team on:

- **UPDATE** — grid edits
- **INSERT_EDITOR** — new rows from Method 1
- **INSERT_UPLOAD** — bulk file

Subject pattern: `Retailer Manager - {ACTION} - {count} row(s)`

Body includes your email, table name, and up to 200 row detail lines.

Audit trail

Every save writes to the **companies audit log**:

- Timestamp
- Your email
- Action type
- Row count
- Success/failure message

Try it yourself — new non-SEC retailer (end-to-end)

1. [Access Management](#) → grant **Edit** on Retailer Adding.

2. **Method 2** → bulk upload row:

- `ticker` : BRBY
- `name` : Burberry Group PLC
- `source` : appropriate non-SEC tag
- `exchange_acronym` : LSE

3. **Insert Bulk Rows**

4. [Company Filings File Manager](#) → upload `BRBY/2025/annual-report/filing.pdf`

5. Analysts open [Company Filing Documents](#) → **BRBY**

Expected outcome: Company appears in filings dropdown; PDF opens in viewer.

View-only experience

Users with **View Only**:

- Can load grid and search
- See info banner: *"Download and save access requires edit permission or higher."*
- **Save Changes**, downloads, and bulk upload disabled

Frequently asked questions

Red restricted banner

Request access in [Access Management](#).

Save failed: duplicate

Ticker + source + exchange already exists — edit existing row instead.

Bulk upload ignored columns

Rename headers to match template exactly.

No data found

Database empty or connection issue — check VPN.

Email failed warning

Save still succeeded; IT can check mail delivery.

PART 17 OF 17

System Logs — IT Administrator Note

Server log viewer — IT administrators only.

The previous section is complete — the next chapter begins below.

Application: Coresight Market Data Portal (MDP)

Page name: System Logs

URL path: `/logs`

Audience: Platform owner and IT operations only. This is **not** a business research tool. Standard MDP users do not need this page for day-to-day work.

What this page is

System Logs is a hidden diagnostic screen inside MDP. It lets the platform owner inspect server log files, run pre-approved diagnostic commands, and review environment configuration.

The page is registered in MDP but **not linked** from the standard user navigation menu. The application labels it *"NOT FOR PUBLIC ACCESS — Admin only debug tool."*

Who can use it

Access is intended for the **system owner** and designated IT staff. If you are a research analyst or business user, use the other guides in this folder instead.

What you will see (high level)

Area	Purpose
Log file browser	Find and open <code>server-log.log</code> and related files
Log viewer	Search and filter log lines by level, page, or text
System information	Host name, working directory, operating system details
Environment reference	Read-only list of common configuration keys
Owner commands	Pre-approved shell commands for troubleshooting

Screenshot pending: This guide intentionally omits UI screenshots. The Logs page is not part of business user training materials.

When to contact IT instead

Use your normal support channel if you need:

- Help with **login**, **permissions**, or **missing data** on business pages
- Investigation of **slow pages** or **errors** you see during research work
- Changes to **company coverage**, **filings**, or **forecasts**

The Logs page is for **infrastructure debugging**, not for fixing business data issues.

Related guides

Business users should use:

- [Business documentation index](#)
- [Access Management](#) for permissions
- Page-specific guides (Market Data, Forecasting, Company Filings, etc.)

— End of System Logs — IT Administrator Note —
