Application: Coresight Market Data Portal (MDP)

Page name: Earnings Calls

URL path: /earnings_calls

Executive summary

Earnings Calls is MDP's transcript library. Read full **earnings call transcripts** quarter by quarter, search for keywords inside one call or **across hundreds of calls at once**, download **PDFs**, and export keyword hits to **Excel**. Arrive from **Earnings Calendar** with the right company and quarter already selected.

Who this is for

Audience	Typical use
Equity research analysts	Read management commentary after a report; verify quotes
Sector strategists	Search all companies for a theme before writing a note
Associates	Download a PDF for offline reading or internal notes
Earnings-calendar users	Jump from a calendar event straight into the matching transcript

What you'll learn

- How to pick **one transcript** (company + year + quarter)
- How **cross-transcript search** works when any filter is set to **ALL**
- How to use **watchlist scope** to limit universe-wide searches
- How to **download PDFs** and export keyword results

What you can do here

- Select a company, fiscal **year**, and **quarter** to read one full call
- Search within that call for words such as `guidance`, `margin`, or `shrink`
- Set **Company**, **Year**, or **Quarter** to **ALL** to search across many transcripts

- Restrict cross-search to a **watchlist** from Screening
- **Download** a PDF of the full transcript
- Export keyword hits to **Excel** when results are available

Page layout at a glance

The page splits into two matched panels:

Area	What it does
Search + filters (left)	Keyword box, company, fiscal year, and quarter
Search results (left, below filters)	Keyword hits with snippets; click View → to open the passage in the transcript
Transcript viewer (right)	Full call text by speaker, or PDF viewer for select non-US companies

Step-by-step walkthrough

Step 1 — Open Earnings Calls

1. Sign in to MDP.
2. Click **Earnings Calls** in the top navigation bar.
3. Wait for the company list and filters to finish loading (large environments may take 10–30 seconds on first visit).

Filters **remember your last choices** between visits on the same browser.

The screenshot displays the 'Earnings Calls' interface. At the top, a navigation bar includes 'Market Data Dashboard', 'Earnings Calls', 'Earnings Calendar', 'Screening', 'News', and a 'Logout' button. The main header features the 'CORESIGHT MARKET DATA Earnings Calls' title. Below this, a search section allows filtering by 'Company' (Target Corporation (TGT)), 'Year' (2006), and 'Quarter' (Q4). A 'Search Transcript' panel on the left prompts users to type a keyword. The main transcript area shows the text of a 2006 Q4 earnings call by Bob Ulrich, with a 'Download' button. The footer contains the 'CORESIGHT RESEARCH' logo, social media icons, and four columns of links: 'LEARN MORE' (Research Subscriptions, Our Events, About Us), 'GET IN TOUCH' (Become a Client, Contact Us), 'QUICK LINKS' (Research Portal, The RetailStic Podcast, AI Council), and a 'Logout' button.

Earnings Calls — full page layout

Step 2 — Read one transcript (single-call mode)

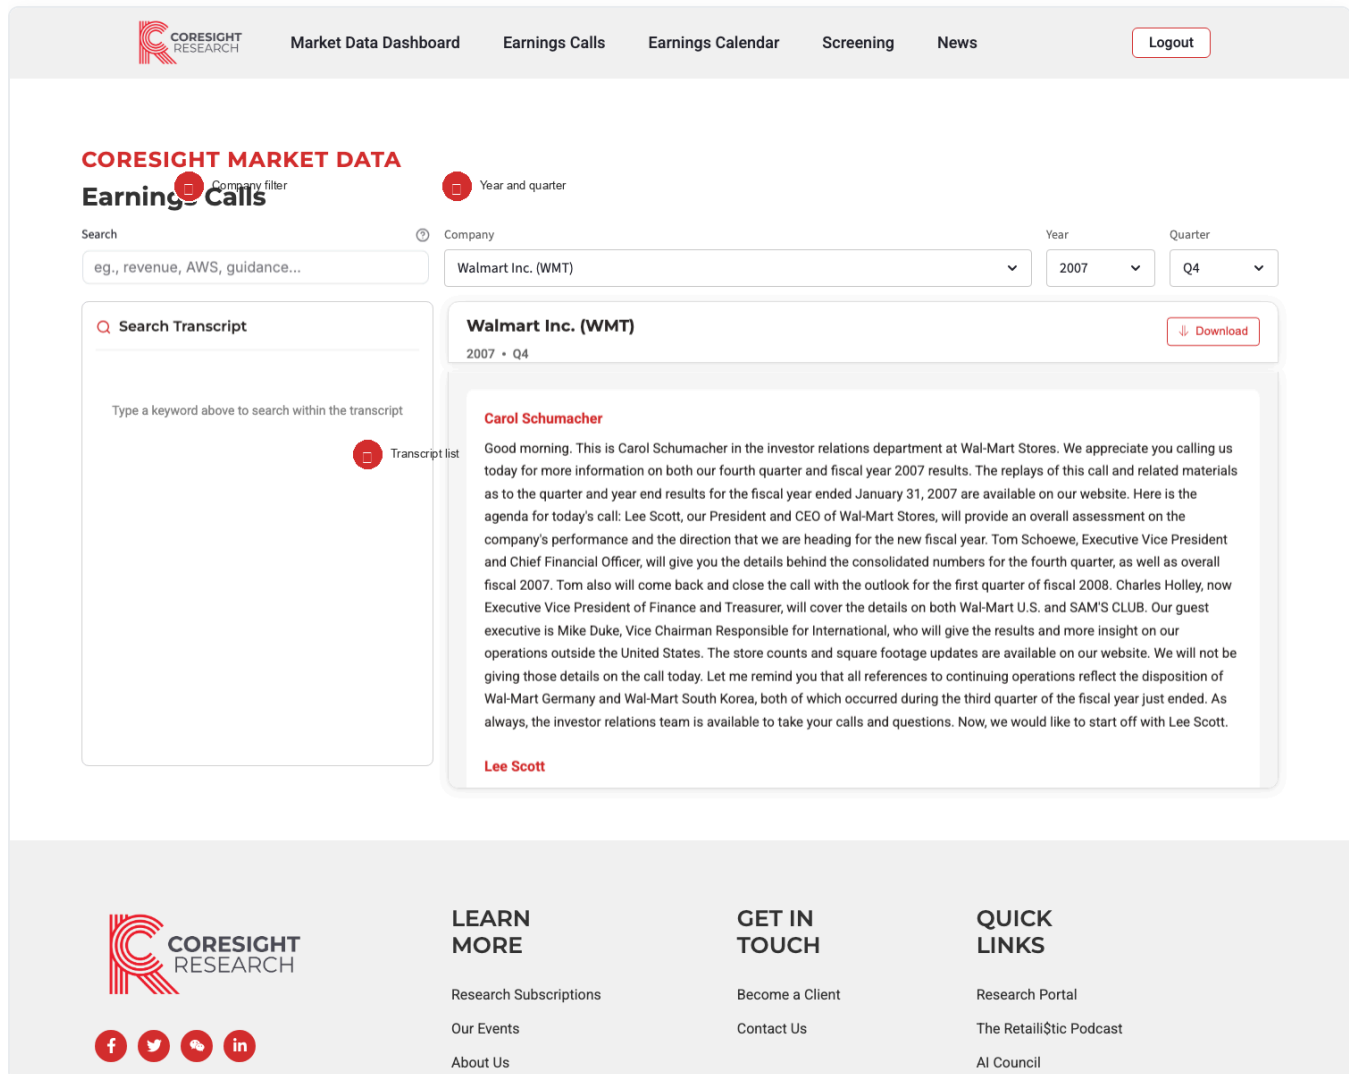

Best for: Deep reading of a single earnings call.

1. **Company** — Pick one company, for example **Apple Inc. (AAPL)**.
2. **Year** — Choose the fiscal year, for example **2024**.
3. **Quarter** — Choose **Q1**, **Q2**, **Q3**, or **Q4**.
4. The right panel shows the full transcript formatted by speaker (Operator, CEO, CFO, analysts, etc.).
5. Optionally type a keyword in **Search** to highlight mentions in the left results panel.

6. Click **View** → on a left-panel hit to scroll the right panel to that speaker section.
7. Click **Download** on the right to save a PDF of the full transcript.

Example — verify a CEO quote

You recall Tim Cook commenting on **services growth** on Apple's Q4 call. Select **AAPL · 2024 · Q4**, search , and jump directly to his remarks without scrolling the entire document.

Earnings Calls — year, quarter, and transcript

Step 3 — Search across all transcripts (cross-search mode)

Best for: Thematic research across your coverage universe.

1. Set **Company** → **All Companies** (or set **Year** or **Quarter** to **ALL**).
2. Enter a keyword — for example `artificial intelligence` or `shrink`.
3. The left panel fills with paginated hits: company, year, quarter, and a speaker snippet.
4. Click **View** → on any row to open that full transcript with the keyword highlighted.
5. Use **Show more** ↓ at the bottom to load additional pages of results.

The right panel shows brief instructions until you open a specific hit — this is normal in cross-search mode.

Example — sector thematic scan

A retail strategist sets all filters to **ALL**, searches `shrink`, and reviews hits across apparel and grocery names ahead of a loss-prevention note. Each **View** → opens the source call in context.

Carol Schumacher

Good morning. This is Carol Schumacher in the investor relations department at Wal-Mart Stores. We appreciate you calling us today for more information on both our fourth quarter and fiscal year 2007 results. The replays of this call and related materials as to the quarter and year end results for the fiscal year ended January 31, 2007 are available on our website. Here is the agenda for today's call: Lee Scott, our President and CEO of Wal-Mart Stores, will provide an overall assessment on the company's performance and the direction that we are heading for the new fiscal year. Tom Schoewe, Executive Vice President and Chief Financial Officer, will give you the details behind the consolidated numbers for the fourth quarter, as well as overall fiscal 2007. Tom also will come back and close the call with the outlook for the first quarter of fiscal 2008. Charles Holley, now Executive Vice President of Finance and Treasurer, will cover the details on both Wal-Mart U.S. and SAM'S CLUB. Our guest executive is Mike Duke, Vice Chairman Responsible for International, who will give the results and more insight on our operations outside the United States. The store counts and square footage updates are available on our website. We will not be giving those details on the call today. Let me remind you that all references to continuing operations reflect the disposition of Wal-Mart Germany and Wal-Mart South Korea, both of which occurred during the third quarter of the fiscal year just ended. As always, the investor relations team is available to take your calls and questions. Now, we would like to start off with Lee Scott.

Lee Scott

Earnings Calls — keyword search results

Step 4 — Limit cross-search to a watchlist

When **Company**, **Year**, and **Quarter** are all **ALL**, a **Watchlist** dropdown appears above the filters.

Setting	Effect
— No watchlist —	Searches every transcript in MDP
Your watchlist	Limits results to tickers on that list (from Screening)

Example — coverage list only

CONFIDENTIAL

Coresight Research — Internal Use Only

Page 9 of 13

Your “Large Cap Retail” watchlist has 18 names. Cross-search **inventory** with that watchlist selected — results include only those 18 companies, not the full database.

Step 5 — Download and export

Action	When available	Output
Download (right panel)	Single transcript loaded	PDF of the full call in your browser
Excel export	Keyword search returned hits	Spreadsheet of matching segments

Excel columns (cross-transcript): Company, Ticker, Year, Quarter, Reporter Name, Whole Paragraph.

Large cross-exports may run in the background; a download link appears when ready.

Transcript types

Standard (US SEC) transcripts

- Right panel shows **speaker-labeled text** — each block starts with the speaker name followed by their remarks.
- Report date and fiscal period appear in the header when available from the earnings calendar.
- Keyword search highlights matches in red.

Non-US / PDF-only transcripts

Some international companies provide transcript **PDF files** instead of plain text. MDP opens an in-page PDF viewer. Keyword search works **page by page**, and you can download the original PDF. Search results may include a **page number** — the viewer scrolls to that page automatically.

Arriving from Earnings Calendar

If you click **View Transcript** on the calendar, MDP opens Earnings Calls with:

- The correct **ticker**, **year**, and **quarter** pre-filled
- The full transcript ready on the right

You can immediately search within that call or download the PDF.

Real examples

“Read Nike’s latest call end-to-end”

1. Open **Earnings Calls**.
2. Select **Nike (NKE)** → most recent **Year** → most recent **Quarter**.
3. Scroll the right panel; use **Download** if you need a PDF.

“Find every mention of DTC in one quarter”

1. **Company** → **Nike (NKE)**, **Year** → **2024**, **Quarter** → **Q3**.
2. **Search** → **DTC**.
3. Click **View** → on the first hit; the right panel scrolls to that speaker and highlights “DTC” in red.

“Search all transcripts for shrink”

1. Set **Company** → **All Companies** (leave Year and Quarter at **ALL** or narrow as needed).
2. **Search** **shrink**.
3. Paginate with **Show more** ↓ and open the most relevant hits with **View** →.

Try it yourself

1. Open **Earnings Calls** and select **Apple Inc. (AAPL)**, **2024**, **Q4**.
2. **Search** **iPhone** and open the first left-panel hit with **View** →.
3. Download the PDF from the right panel.
4. Switch to cross-search: set **Company** → **All Companies** and search **guidance**.

5. If you have a watchlist, repeat the search with that watchlist selected and compare result counts.
6. From **Earnings Calendar**, click **View Transcript** on any event and confirm filters pre-fill correctly.

Empty or loading states

Message	Meaning	What to do
<i>Loading earnings call data...</i>	MDP is loading company list and transcript metadata	Wait; retry if it persists
<i>No earnings call data available</i>	Transcript database unreachable or empty	Retry later or contact your Coresight administrator
Right panel: <i>Search Across Transcripts</i>	You are in ALL mode without opening a hit yet	Type a keyword or click View → on a left-panel result
<i>PDF not yet loaded</i>	Non-US PDF still downloading	Wait a moment and search again

Tips & gotchas

- Cross-search is powerful but broad — add a **Watchlist** to keep results relevant.
- Short keywords (one or two letters) may return noisy hits; prefer full words like `margin` over `m`.
- For PDF transcripts, note the **page number** in search results.
- Filters cascade: changing **Company** updates available years and quarters.
- Published transcripts here remain the **canonical source** when available; see [Live Earnings Transcript](#) only for audio you supply yourself.

Quick reference

I want to...	Do this
Read one full call	Company + Year + Quarter → scroll right panel
Find a word in one call	Set filters → Search → click left-panel hit
Search all companies	Set any filter to ALL → Search
Limit search to my list	ALL mode → choose Watchlist
Save offline	Download on the right (PDF)
Export hits to Excel	Run keyword search → use Excel control when shown
Open from calendar	View Transcript on Earnings Calendar

Where to go next

- [Earnings Calendar](#) — See who reports when; link to transcripts
