How this guide is structured: Screening guides walk criterion-by-criterion with expected counts after each step, saved-filter reuse, and export paths. Numbered callouts in navigation screenshots map directly to UI labels.

Executive summary

Screening lets you **find companies** (or people and corporate events) that match business rules—for example *US apparel retailers with revenue above \$1 billion*—without writing formulas. Stack criteria one at a time, see how many names remain, **save** filter sets, attach **watchlists**, and **export** results to Excel. Companies that lack a data point usually stay in the list with **N/A** rather than disappearing silently.

Who should read this

- Researchers building peer groups, thematic lists, or event monitors
- Strategy and sales teams who need reproducible company universes for outreach or analysis
- Anyone who saved a screen last month and wants to rerun it on fresh data

What you'll learn

- How to open Screening and choose **Screen For** mode
- How **watchlists**, **criteria types**, and **saved screenings** fit together
- End-to-end steps to run a screen, export Excel, and save results as a new watchlist

How to open Screening

1. Sign in to MDP.
2. Click **Screening** in the top navigation bar.

Expected outcome: Page title **CORESIGHT MARKET DATA** with a subtitle such as **Company Screening**, **Key Developments Screening**, or **People Screening** depending on mode.

Screening — default Companies mode

Callout	What it is	What to do
①	Screen For row	Confirm Companies (or switch to Key Devs / People).
②	Watchlists dropdown	Limit the universe to a saved list—or leave — None — for all names.
③	Show Results button	Run the screen once you add criteria or pick a watchlist.

Navigation — Screening in the top menu

Callout	What it is	What to do
①	Top navigation bar	Same menu on every authenticated MDP page.
②	Screening link (active)	Confirms you are on the Screening builder.
③	Screen For row	Confirm Companies (or switch mode).

Screen For — three active modes

The **Screen For** row is a set of radio buttons across the top of the builder.

Mode	Subtitle	Status	What you get
Companies	Company Screening	Active	Financial and descriptive filters; main results grid
Key Devs	Key Developments Screening	Active	Corporate events (M&A, leadership, etc.) per matched company
People	People Screening	Active	Executive compensation for matched companies
Equities	Equity Screening	Coming soon	Placeholder
Fixed Income	Fixed Income Screening	Coming soon	Placeholder
Transactions	Transaction Screening	Coming soon	Placeholder
Projects/Portfolios	Project/Portfolio Screening	Coming soon	Placeholder

Important: Switching modes **clears current criteria** so results stay meaningful for the new object type. Save your work first if you need to return to it.

Watchlists — limit who you screen

The **Watchlists** bar sits above **Add Criteria**.

Control	What it does
Watchlists dropdown	— None — screens the full universe, or pick a saved list
Edit / Manage	Create, rename, add/remove companies, share access
Active line (red text)	When selected: <i>Filtering by: List name (N companies)</i>

Screening — Watchlists dropdown on the builder

Callout	What it is	What to do
①	Screen For row	Confirm Companies (or switch mode).
②	Watchlists dropdown	Pick a saved list or leave — None — .
③	Edit / Manage	Open the watchlist manager dialog.

Why watchlists matter

- Rerun the same screen on a **fixed peer set** without re-picking dozens of tickers.
- Share lists with colleagues (view, edit, or admin access depending on grant).

- **Show Results** with **only** a watchlist and **no** criteria still works—you get all companies on that list.

Watchlist dialog — what you can do

Create/Edit Watchlist

ABF 	Create Watchlist	Associated British Foods plc	Apparel and footwear speciality retailers	United Kingdom

Close

Screening — new watchlist form

Callout	What it is	What to do
①	Name field	Required—identify the list (for example “US Big-Box Peers”).
②	Search Companies	Multiselect by company name or ticker.
③	Search Sectors	Bulk-add names from a sector tag.
④	Create Watchlist	Save the new list.

Area	Action
Name & description	Identify the list ("US Big-Box Peers")
Add companies	Search multiselect by company name or ticker
Add by sector	Bulk-add names from a sector tag
Company table	Review members; delete individual rows
Access grants	Invite colleagues with view, edit, or delete rights
Save / Delete	Persist changes or remove the list

Try it: Build a watchlist of ten apparel retailers, select it in the dropdown, then add **Total Revenue Greater Than \$1,000 mm** for FY Latest—results evaluate only those ten names.

Add Criteria — four building blocks

Below the watchlist bar, **Add Criteria** offers four buttons (plus **Saved Screenings** on the right).

Button	Purpose
Industry Classifications	Keep companies in selected retail / industry sectors
Geographic Locations	Keep companies incorporated in selected countries
Financial Information	Filter on statements, key stats, ratios, segments, estimates, or forecasts
Key Developments by Category	Filter on corporate events (acquisitions, store openings, leadership, etc.)
Saved Screenings	Load, inspect, edit, or delete criteria sets you saved earlier

Click a button once to open its form; click again to collapse. Only one form is open at a time.

Building criteria — step by step

Industry Classifications

1. Click **Industry Classifications**.
2. In the expander, use **Select industries** (multiselect). Type to search.
3. Click **Add Criteria** to stack the rule, or **Cancel** to close without saving.

Expected outcome: A numbered criterion card appears in the **Active criteria** stack with a count of industries selected. Expand the card to see every industry as a pill.

Example: Choose **Specialty Retail** and **Department Stores** for traditional brick-and-mortar focus.

Step 3 — Set Period Type & Year

Period Type

FY (Annual)

Year selection ⓘ

☒ Single year
☐ Year range

Year

Latest

Step 4 — Set Operator & Value

Screening — value in \$mm

Callout	What it is	What to do
①	Operator	Confirms the comparison type.
②	Value (\$mm) field	Enter the threshold in millions (1000 = \$1 billion).
③	Add Criteria	Finish the wizard step.

Step 1 — Statement type

CONFIDENTIAL

Coresight Research — Internal Use Only

Page 23 of 34

Statement type	Examples of metrics
Income Statement	Total Revenue, Gross Profit, Operating Income, Net Income
Balance Sheet	Total Assets, Total Debt, Cash
Cash Flow	Operating Cash Flow, Capital Expenditure
Key Stats	Revenue, EBITDA, EPS
Ratios	Gross Margin, ROA, Debt/Equity
Business Segments	Segment revenue or profit by division
Geographical Segments	Revenue by region
Estimates	Forward analyst consensus fields
Forecasting	Coresight model forecast fields

Step 2 — Metric — Pick the exact line item (options change with statement type).

Step 3 — Period type and year

Period type	Meaning
FY	Single fiscal year (pick year or Latest)
CQ	Calendar quarter (Q1–Q4)
FQ	Fiscal quarter aligned to company fiscal year end
TQ	Trailing quarters as columns (Income/Balance/Cash only)

Supported statements may also offer **year range** or **quarter range** to show multiple period columns.

Step 4 — Operator and value

Operator	Use when
Greater Than	Minimum threshold
Less Than	Maximum threshold
Between	Lower and upper bound
Equals / $\geq$ / $\leq$	Exact or inclusive cuts

Values are entered in millions of dollars (\$mm) unless the metric is a percent or multiple (unit label changes accordingly).

Optional — Segment members (Business / Geographical Segments only) — Limit to specific segments (for example **North America** only).

Optional — Additional Data (Income, Balance, Cash only) — Nested filters for **Credit Ratings (S&P)** or **Store Counts**.

4. Click **Add Criteria**.

Worked example — retailers with revenue > \$1B

Step	Action
1	Screen For: Companies
2	Financial Information → Income Statement → Total Revenue
3	Period: FY , Year: Latest
4	Operator: Greater Than , Value: 1000 (= \$1,000 million = \$1 billion)
5	Add Criteria → Show Results

Optional first: **Industry Classifications** → retail sectors to exclude non-retail names that clear the revenue bar.

Screening — Key Developments category picker

Callout	What it is	What to do
①	Key Developments by Category tab	Open the event-type builder.
②	Select Categories dropdown	Choose acquisitions, store openings, leadership changes, etc.
③	Add Criteria	Stack the event filter.

1. Click **Key Developments by Category**.
2. Select **event categories** (acquisitions, store openings, executive changes, etc.).

3. Choose a **time window** (preset ranges or custom dates).
4. Click **Add Criteria**.

In **Key Devs** mode, **Show Results** produces **one row per event** with company, date, category, headline, and source link where available.

Active criteria stack

After each **Add Criteria**, a card appears above the action buttons showing:

- **Number** (order matters—criteria apply top to bottom)
- **Summary line** (human-readable)
- **Edit** and **Remove** controls
- Expandable detail for every industry, country, or threshold

Status bar messages

Message	Meaning
<i>Universe: N companies available</i>	Full MDP universe (N changes over time)
<i>Universe: N companies (watchlist: Name)</i>	Watchlist is active
<i>Working set: N companies — last filter: ...</i>	Count after criteria applied
<i>No companies match all current criteria</i>	Combination too tight—relax a rule

Show Results, Clear All, and Save Criteria

Button	Behavior
Show Results (red)	Runs or refreshes the results table. Enabled when you have at least one criterion or an active watchlist. A loading overlay may appear while the grid builds.
Clear All	Removes every criterion and clears results; does not delete saved watchlists themselves.
Save Criteria	Appears once you have criteria—name and describe the set for later reuse.

Saved Screenings dialog

- Browse cards (name, author, date).
- **Load** applies criteria to the builder.
- **View / Edit** tweaks filters or renames the set.
- **Delete** removes the saved set (with confirmation).
- Share view or edit rights with colleagues like watchlists.

Results grid (Companies mode)

When **Show Results** completes in **Companies** mode, you see a **filterable data grid**.

Typical columns

- Company name and ticker (pinned left for horizontal scroll)
- One column per criterion (metric value or **N/A**)
- Extra context columns depending on criteria type

In-grid actions

Action	How
Sort	Click column headers
Filter	Column header filter menus
Scroll	Wide tables scroll horizontally; company name stays visible
Select rows	Checkboxes when saving a new watchlist from results

Segment criteria may render an expanded segment breakdown below the main grid with its own Excel export when columns are wide.

Excel export

When results are visible, **Excel** or **Download Excel** appears above the grid.

Mode	Typical file name
Companies	Screening_Results_YYYYMMDD_HHMM.xlsx
Key Devs	KeyDev_Screening_...xlsx
People	People_Screening_...xlsx

The file matches your current results. If export fails, retry or contact Coresight support.

Workflow: Run the \$1B revenue screen → sort by revenue descending → **Excel** → paste into a sector dashboard.

Key Developments mode — differences

Topic	Companies mode	Key Devs mode
Primary output	Company rows	Event rows
Typical criteria	Financial + industry/geo	Key Developments categories + optional company filters
Show Results without criteria	Needs watchlist or criteria	Watchlist alone can list events for those tickers
Excel	Company metric table	Event list with categories and dates

Use when the question is *“What happened?”* rather than *“Who cleared a financial bar?”*

People mode — differences

People Screening focuses on **executive compensation** for companies matching industry, geography, and optional financial filters.

Topic	Behavior
Criteria palette	Industry and Geography always; Financial optional
Watchlist	Still available
Results	Executives with pay components
Year filter	Dropdown above table for filing year
Excel	People-specific workbook

Save results as a new watchlist

After a company screen:

1. Select interesting rows in the grid.
2. Use **Save as Watchlist** when the panel appears.
3. Reuse that list on the next screen or open names in [Market Data](#).

Expected outcome: A named list you can pick from the **Watchlists** dropdown on future visits.

End-to-end example — US retailers over \$1B revenue

Step	Action
1	Open Screening → confirm Companies is selected
2	<i>(Optional)</i> Geographic Locations → United States → Add Criteria
3	Industry Classifications → retail-related industries → Add Criteria
4	Financial Information → Income Statement → Total Revenue → FY Latest → Greater Than → 1000 → Add Criteria
5	Review status bar count
6	Show Results
7	Sort by revenue column descending
8	Excel to download
9	Save Criteria as “US Retail >\$1B Revenue” for one-click reload next month

Try it yourself

Task: Build and save a simple size screen.

1. Click **Screening** in the top nav.
2. Stay on **Companies**.
3. Add **Financial Information** → Income Statement → **Total Revenue** → FY **Latest** → **Greater Than** → **500** (\$500 million).
4. Click **Show Results** and note the match count.
5. **Save Criteria** as “Mid-size retailers >\$500mm”.
6. Open **Market Data Dashboard** for the first result and compare revenue to your threshold.

Tips for accurate screens

Tip	Why
Start broad, then narrow	See which criterion removed too many names
Prefer Latest FY for "current" size	Avoids stale fiscal years
Remember \$mm	1000 = \$1 billion revenue
Use watchlists for fixed peers	Faster and reproducible
N/A in a column	Missing metric for that period—not always a failed screen
Re-run Show Results after edits	Grid does not auto-refresh on every small change
Save before switching Screen For mode	Mode switch clears criteria

FAQ and troubleshooting

What you see	What to try
Show Results disabled	Add at least one criterion or select a watchlist
Zero companies	Loosen thresholds or remove the last criterion
Long loading overlay	Wait up to a minute; refresh once
Excel button missing	Run Show Results first; confirm grid is not empty
Mode switch lost my work	Expected—save criteria before switching modes
Geography form warning	Contact Coresight support if it persists after refresh
